Prophets, Lovers and Giraffes Orly Goldwasser, 2002 The book's central proposition is that the prominent feature of the hieroglyphic script which Egyptologists call determinatives makes up an elaborate system of classifiers All items of the lexicon take motivated pictorial classifiers By this device the script reflects the map of knowledge organization of ancient Egyptian culture The book aims to reveal the principles and constraints governing the codification of the ancient Egyptian universe in this system There is to date no comprehensive study either in Egyptology or in cognitive linguistics of the hieroglyphic classifiers as a structured system The present work attempts to fill the existing hiatus by bridging the disciplines of Egyptology and cognitive studies using the tools of the latter to elucidate the former and thus perhaps arrive at new perspectives on both From the Egyptological angle the book deals with the ancient Egyptians nomenclature for items in the world and the relationship between lexicon and the knowledge organization However the events occurring in the picture script render cognitive processes visible to our inspection hundreds of years before they have ripened into the Egyptian language This visibility bears directly on a number of crucial questions in cognitive linguistics and ethnobiology The book also includes an introduction to the hieroglyphic script
