

The background of the cover features a close-up, slightly blurred photograph of antique books. The spines of the books are visible, showing various shades of brown and tan, suggesting aged leather or parchment. In the foreground, a rectangular photograph with a white border is partially visible, showing a dark, textured surface. The overall lighting is soft and warm, creating a sense of history and antiquity.

Hoare,1991 *Eight Decisive Books of Antiquity* Frederick R. Hoare,1973-01-01 *The Torah and the Stoics on humankind and nature* J.J. Boersema,2021-09-06 The environmental problematique is intimately bound up with deep seated human attitudes regarding our relationship with nature Here in the west those attitudes have been shaped to no small degree by the canonical texts of the Bible and the classical philosophers In this book the author re examines some of these seminal texts arguing that what we today know as Christian cosmology is in fact a grafting of classical Greek philosophy onto ancient Israelite thought with certain valuable traditions being all but lost in the process The dietary laws of Leviticus and Deuteronomy in particular still prove surprisingly relevant today Often misread on this point the creation narratives of Genesis can likewise serve as a rich point of departure for examining our attitudes towards the natural world A reappraisal of these sources is necessary and feasible There is no need for an appeal to cosmologies alien to our own culture nor for recourse to New Age beliefs in all their variety *Reading Genesis Well* C. John Collins,2018-11-13 What does it mean to be a good reader of Genesis 1 11 What does it mean to take these ancient stories seriously and how does that relate to taking them literally Can we even take any of this material seriously *Reading Genesis Well* answers these questions and more promoting a responsible conversation about how science and biblical faith relate by developing a rigorous approach to interpreting the Bible especially those texts that come into play in science and faith discussions This unique approach connects the ancient writings of Genesis 1 11 with modern science in an honest and informed way Old Testament scholar C John Collins appropriates literary and linguistic insights from C S Lewis and builds on them using ideas from modern linguistics such as lexical semantics discourse analysis and sociolinguistics This study helps readers to evaluate to what extent it is proper to say that the Bible writers held a primitive picture of the world and what function their portrayal of the world and its contents had in shaping the community **A History of Public Administration** E. N. Gladden,2019-05-29 Originally published in 1972 Gladden argues that when more and more attention is being given to the history of particular activities to specialist as opposed to general history there is a case for attempting to redress the balance between

government and administration This book offers an investigation of the administrative context of earlier ages and raises the suspicion that administration like human nature may not have varied very much since human society began It is an attempt to provide a highly selective introductory history of this vast subject with special emphasis on its public aspects including chapters on Medieval Europe the Middle East Early American Civilizations and more The Life and Times of Hammurabi Tamera Bryant,2019-12-05 Hammurabi was an important leader in ancient Mesopotamia Following the model of the warrior king Sargon Hammurabi built the tiny city state of Babylon into a vast empire He was recognized as a hands on ruler Not content to delegate duties to governors and advisors Hammurabi was personally involved with all the goings on in his empire From the digging of canals to the construction of huge temples Hammurabi was very interested in justice and fairness He thought of himself as a shepherd and protector of all his people He wanted everyone the poor and the wealthy to be treated fairly In the second half of his reign Hammurabi compiled a lengthy collection of laws into a single code It is one of the oldest known law codes You can find reminders of this ancient code in law books around the world **Women in Antiquity** Stephanie Lynn Budin,Jean Macintosh Turfa,2016-08-12 This volume gathers brand new essays from some of the most respected scholars of ancient history archaeology and physical anthropology to create an engaging overview of the lives of women in antiquity The book is divided into ten sections nine focusing on a particular area and also includes almost 200 images maps and charts The sections cover Mesopotamia Egypt Anatolia Cyprus the Levant the Aegean Italy and Western Europe and include many lesser known cultures such as the Celts Iberia Carthage the Black Sea region and Scandinavia Women s experiences are explored from ordinary daily life to religious ritual and practice to motherhood childbirth sex and building a career Forensic evidence is also treated for the actual bodies of ancient women Women in Antiquity is edited by two experts in the field and is an invaluable resource to students of the ancient world gender studies and women s roles throughout history **Mirrors and Mirroring from Antiquity to the Early Modern Period** Maria Gerolemou,Lilia Diamantopoulou,2020-01-09 This volume examines mirrors and mirroring through a series of multidisciplinary essays especially focusing on the intersection between technological and cultural dynamics of mirrors The international scholars brought together here explore critical questions around the mirror as artefact and the phenomenon of mirroring Beside the common visual registration of an action or inaction in a two dimensional and reversed form various types of mirrors often possess special abilities which can produce a distorted picture of reality serving in this way illusion and falsehood Part I looks at a selection of theory from ancient writers demonstrating the concern to explore these same questions in antiquity Part II considers the role reflections can play in forming ideas of gender and identity Beyond the everyday we see in Part III how oracular mirrors and magical mirrors reveal the invisible divine prosthetics that allow us to look where the eye cannot reach Finally Part IV considers mirrors roles in displaying the visible and invisible in antiquity and since The Aryan Path ,1952 The Irish Ecclesiastical Record ,1952 **Transformations of Time and Temporality in Medieval and Renaissance**

Art Simona Cohen,2014-03-10 Although studies of specific time concepts expressed in Renaissance philosophy and literature have not been lacking few art historians have endeavored to meet the challenge in the visual arts This book presents a multifaceted picture of the dynamic concepts of time and temporality in medieval and Renaissance art adopted in speculative ecclesiastical socio political propagandist moralistic and poetic contexts It has been assumed that time was conceived in a different way by those living in the Renaissance as compared to their medieval predecessors Changing perceptions of time an increasingly secular approach the sense of self determination rooted in the practical use and control of time and the perception of time as a threat to human existence and achievements are demonstrated through artistic media Chapters dealing with time in classical and medieval philosophy and art are followed by studies that focus on innovative aspects of Renaissance iconography Piracy, Pillage, and Plunder in Antiquity Richard Evans,Martine De Marre,2019-08-05 Piracy Pillage and Plunder in Antiquity explores appropriation in its broadest terms in the ancient world from brigands mercenaries and state sponsored piracy to literary appropriation and the modern plundering of antiquities The chronological extent of the studies in this volume written by an international group of experts ranges from about 2000 BCE to the 20th century The geographical spectrum is similarly diverse encompassing Africa the Mediterranean and Mesopotamia allowing readers to track this phenomenon in various different manifestations Predatory behaviour is a phenomenon seen in all walks of life While violence may often be concomitant it is worth observing that predation can be extremely nuanced in its application and it is precisely this gradation and its focus that occupies the essential issue in this volume Piracy Pillage and Plunder in Antiquity will be of great interest to those studying a range of topics in antiquity including literature and art cities and their foundations crime warfare and geography *The Downside Review* ,1952 **Eight Decisive Books of Antiquity** Frederick Russell Hoare,1969 **Book Review Digest** ,1953 **The Publishers Weekly** ,1970 **The Last Great War of Antiquity** James Howard-Johnston,2021-05-13 The last and longest war of classical antiquity was fought in the early seventh century It was ideologically charged and fought along the full length of the Persian Roman frontier drawing in all the available resources and great powers of the steppe world The conflict raged on an unprecedented scale and its end brought the classical phase of history to a close Despite all this it has left a conspicuous gap in the history of warfare This book aims to finally fill that gap The war opened in summer 603 when Persian armies launched co ordinated attacks across the Roman frontier Twenty five years later the fighting stopped after the final forlorn counteroffensive thrusts of the Emperor Heraclius into the Persians Mesopotamian heartland James Howard Johnston pieces together the scattered and fragmentary evidence of this period to form a coherent story of the dramatic events as well as an introduction to key players Turks Arabs and Avars as well as Persians and Romans and a tour of the vast lands over which the fighting took place The decisions and actions of individuals particularly Heraclius a general of rare talent and the various immaterial factors affecting morale take centre stage yet due attention is also given to the underlying structures in both belligerent empires and to the Middle East under

Persian occupation in the 620s The result is a solidly founded critical history of a conflict of immense significance in the final episode of classical history Ancient Arms Race: Antiquity's Largest Fortresses and Sasanian Military Networks of Northern Iran Eberhard Sauer, Jebrael Nokandeh, Hamid Omrani Rekavandi, 2023-02-16 Which ancient army boasted the largest fortifications and how did the competitive build up of military capabilities shape world history Few realise that imperial Rome had a serious competitor in Late Antiquity Late Roman legionary bases normally no larger than 5ha were dwarfed by Sasanian fortresses often covering 40ha sometimes even 125 175ha The latter did not necessarily house permanent garrisons but sheltered large armies temporarily perhaps numbering 10 50 000 men each Even Roman camps and fortresses of the Early and High Empire did not reach the dimensions of their later Persian counterparts The longest fort lined wall of the late antique world was also Persian Persia built up between the fourth and sixth centuries AD the most massive military infrastructure of any ancient or medieval Near Eastern empire if not the ancient and medieval world Much of the known defensive network was directed against Persia's powerful neighbours in the north rather than the west This may reflect differences in archaeological visibility more than troop numbers Urban garrisons in the Romano Persian frontier zone are much harder to identify than vast geometric compounds in marginal northern lands Recent excavations in Iran have enabled us to precision date two of the largest fortresses of Southwest Asia both larger than any in the Roman world Excavations in a Gorgan Wall fort have shed much new light on frontier life and we have unearthed a massive bridge nearby A sonar survey has traced the terminal of the Tammisheh Wall now submerged under the waters of the Caspian Sea Further work has focused on a vast city and settlements in the hinterland Persia's Imperial Power our previous project had already shed much light on the Great Wall of Gorgan but it was our recent fieldwork that has thrown the sheer magnitude of Sasanian military infrastructure into sharp relief The Catholic Periodical Index Laurence Andrew Michael Leavey, 1954
