the printing gunpowder guncasting shipbuilding metallurgical and drilling technologies while others deal with mapping techniques the adoption of written calculation and mechanical clocks as well as the use of medical techniques such as pulse taking and electrotherapy While human mobility played a significant role in the exchange of knowledge translating European books into local languages helped the introduction of new knowledge in mathematical physical and natural sciences from central Europe to its periphery and to the Middle East and Asian cultures The book argues that the process of transmission of knowledge whether theoretical or practical was not a simple and one way process from the donor to the receiver as it is often admitted but a multi dimensional and complex cultural process of selection and transformation where ancient scientific and local traditions and elements The book explores the issue from a different geopolitical perspective namely not focusing on a singular recipient and several points of distribution namely the metropolitan centres of science medicine and technology but on regions that are both recipients and distributors and provides new perspectives based on newly investigated material for historical studies on the cross scientific exchanges between different parts of the world **Religion and Politics in**

Europe and Latin America Andrés Pérez-Baltodano,2025-09-22 This book presents a comparative interpretation of the socio emotional histories of Europe and Latin America offering a novel perspective on the roles of religion and politics in managing collective fear and insecurity in these two regions Emphasizing the historical fears and insecurities faced by underprivileged sectors of Latin American society the book draws on cognitive and social sciences to compile political socioeconomic and cultural landmarks identifying continuities and ruptures in European and Latin American histories The volume highlights Europe s success and Latin America s relative failure in crafting political visions capable of taming fear and insecurity It shows how this largely correlates with how meticulous providentialism the belief that God governs history has been supplanted by general providentialism the belief that God does not intervene in history in the religious cultures of the two regions This shift corresponds to the degree of control individuals feel they have over their history and destiny which typically aligns with their actual social affordances At the heart of these discussions is the notion that the authenticity of the theoretical foundations of political visions is conditioned by society s view of the divine which ultimately determines the capacity of these visions potential to impact history Religion and Politics in Europe and Latin America is a useful resource for students and academics interested in Latin American and European history politics and culture From Sunlight to Insight Geerd Magiels,2010 Who discovered photosynthesis Not many people know Jan IngenHousz name has been forgotten his life and works have disappeared in the mists of time Still the tale of his scientific endeavour shows science in action Not only does it open up an undisclosed chapter of the history of science it is an ideal as under researched episode in the history of science that can help to shine some light on the ingredients and processes that shape the development of science This paves the way for a fresh multidimensional approach in the philosophy of science towards an ecology of science P 4 of cover
