C American Association of Inventors and Manufacturers,1892 **A Century of Electrical Engineering and Computer Science at MIT, 1882-1982** Karl L. Wildes,Nilo A. Lindgren,1985 The book s text and many photographs introduce readers to the renowned teachers and researchers who are still well known in engineering circles Electrical engineering is a protean profession Today the field embraces many disciplines that seem far removed from its roots in the telegraph telephone electric lamps motors and generators To a remarkable extent this chronicle of change and growth at a single institution is a capsule history of the discipline and profession of electrical engineering as it developed worldwide Even when MIT was not leading the way the department was usually quick to adapt to changing needs goals curricula and research programs What has remained constant throughout is the dynamic interaction of teaching and research flexibility of administration the

interconnections with industrial progress and national priorities The book's text and many photographs introduce readers to the renowned teachers and researchers who are still well known in engineering circles among them Vannevar Bush Harold Hazen Edward Bowles Gordon Brown Harold Edgerton Ernst Guillemin Arthur von Hippel and Jay Forrester The book covers the department's major areas of activity electrical power systems servomechanisms circuit theory communications theory radar and microwaves developed first at the famed Radiation Laboratory during World War II insulation and dielectrics electronics acoustics and computation This rich history of accomplishments shows moreover that years before Computer Science was added to the department's name such pioneering results in computation and control as Vannevar Bush's Differential Analyzer early cybernetic devices and numerically controlled servomechanisms the Whirlwind computer and the evolution of time sharing computation had already been achieved

Bensman, 2015-11-03 The Radio Act of August 13 1912 provided for the licensing of radio operators and transmitting stations for nearly 15 years until Congress passed the Radio Act of 1927 From 1921 to 1927 there were continual revisions and developments and these still serve as the basis for current broadcast regulation This book chronicles that crucial six year period using primary documents The administrative structure of the Department of Commerce and the personnel involved in the regulation of broadcasting are detailed The book is arranged chronologically in three sections Broadcast Regulation and Policy from 1921 to 1925 Congestion and the Beginning of Regulatory Breakdown in 1924 and 1925 and Regulatory Breakdown and the Passage of the Act of 1927 There is also discussion of the Department of Commerce divisions and their involvement until they were absorbed by the Federal Communication Commission A bibliography and an index conclude the work

Electrical Engineer, 1892 *The Fuzzification of Systems* Rudolf Seising, 2007-08-16 In 1965 Lotfi Zadeh a professor of electrical engineering at the University of California in Berkeley published the first of his papers on his new Fuzzy Set Theory Since the 1980s this mathematical theory of unsharp amounts has been applied in many different fields with great success The word fuzzy has also become very well known among non scientists thanks to extensive advertising campaigns for fuzzy controlled household appliances and to their prominent presence in the media first in Japan and then in other countries On the other hand the story of how Fuzzy Set Theory and its earliest applications originated remains largely unknown In this book the history of Fuzzy Set Theory and the ways it was first used are incorporated into the history of 20th century science and technology Influences from philosophy system theory and cybernetics stemming from the earliest part of the 20th century are considered alongside those of communication and control theory from mid century Today Fuzzy Set Theory is the core discipline of soft computing and provides new impetus for research in the field of Artificial Intelligence
