are going to help you get an insect free and fungus free produce and harvest The ills from which the garden suffers are usually divided into animal pests and fungus diseases Weeds also really can be included under this heading as they have almost as detrimental an affect upon garden plants as either of the other classes of affliction There should be no delay in dealing with all these three types of destructive elements in your garden because the damage caused by their inroads on your plants are often going to be extensive and cumulative in effect Prompt action should always be taken and where the preventive measures are possible the resulting improvement in in plant health will be marked I am going to start with animal pests who are definitely not going to be controlled by pesticides However they are going to be preventive measures which help take care of animals in your garden      *The Book of Garden Pests* R.
