[A Beginner's Guide to Cacti](#) How to Make a Cactus Garden Table of Contents Introduction Cactus Spines Choosing Your Cacti Growing Your Cacti Preparing Soil for Cactus Suitable Soil for Cactus Preparing Leaf Mold Potting Your Cactus Plant Watering Your Cactus Watering Methods Light spray During Summer Cactus Decaying Sunlight Hibernation for Cactus Protecting Your Cactus in the Winter Planting Your Cactus Offsets How to grow Cacti from Cuttings Cactus as Food Diseases and pests Appendix Cactus clubs Author Bio Introduction For all those people who have confronted a prickly pear at least once in their lives cacti are boring spiny plants Also cactus plants have long been the subject of a superstition that any house which has cactus growing in it is going to be filled up with strife and trouble and arguments That is because of the spines of the cactus which are known as spikes promote ill feeling There is something so odd about a cactus plant that it is often difficult until you grow them yourself to believe that these really belong to the plant kingdom Historically how many pioneer explorers of the desert areas in America saw them in the twilight and thought stories of monsters with their arms outstretched and no heads who turned into plants in the desert in the morning No wonder these giants which can grow up to 63 feet have always been the subject for legends Even today most of us are told tales about the cactus which many of us half believe Some of us have heard that cacti are poisonous Other people are going to tell us that cacti flower only once in 100 years and only when the area is subjected to rain The first tale is totally and true The second tale is also untrue because certain species of cacti will flower almost every year if given proper cultivation and care Cactuses also known as cacti belong to the family Opuntiaceae Many of these plant varieties have lost true leaves but they still have fluted and ribbed stems The stems store water and many of the desert varieties have very short growing time periods Their periods of dormancy may be long because many times they have to go without water and rainfall for years especially when they are growing in the Atacama Desert Cactus originally are natives of the Americas except for some species which grow in Africa
