**Revolvers and Pistolas, Vaqueros and Caballeros** D. H. Figueredo, 2014-12-09 This riveting expos reveals how a distorted belief in Anglo superiority necessitated the rewriting of American western history replacing heroic images of Mexican and Spanish cowboys with negative stereotypes Early Anglo settlers in the Old West crafted negative images of Latinos in part to help justify the takeover of land occupied by Mexicans and Spaniards at the time Unfortunately these depictions were perpetuated throughout the 20th century in art popular culture and media eventually reshaping the narrative of the American West to the exclusion of the non Anglo people This book contrasts dominant lore with historical reality to provide a broad overview of the history and contributions of Latinos in the Old West Author D H Figueredo sets out to debunk the myths and falsehoods of the American West by chronicling the cultural perceptions that led to such historical inaccuracies Through spellbinding accounts chapters address such topics as the legends behind the caballeros Mexican culture in the Old West and the search for cities of gold in the Southwest Arranged chronologically and thematically the book

examines how popular culture diminished the role of the Mexican vaqueros and illustrates how the image of the Anglo cowboy became the iconic symbol of the Old West

**East Asia, Latin America, and the Decolonization of Transpacific Studies** Chiara Olivieri, Jordi Serrano-Muñoz, 2022-01-03 In this collective work researchers from different disciplines reflect upon the challenges and opportunities of decolonizing transpacific studies through the lens of a few paradigmatic case studies that deal with connections between East Asia and Latin America The present book offers a productive problematization of the idea of the transpacific as a concept and a space that is not restricted to a single definition We defend that the transpacific can instead promote an understanding of agents and experiences that share many common traits that have been generally overlooked by a hegemonic interpretation of knowledge and the relationship between regions By fostering an environment that not only accepts a plurality of views but that actively looks to accommodate analogous tangential and even contradicting approaches to the study of our ideas we seek a double objective First we hope to highlight precisely the richness within the idea of the transpacific avoiding sticking to any particular conception to it while at the same time acknowledging and owning each of our points of enunciation Our second objective is part of a constant struggle in the quest towards social and epistemic justice By adopting this stance of plurality we can fight against structures of knowledge production and reproduction that willingly or unintentionally instill specific interpretations in ways that inculcate exclusivity The goal of this book is opening up and expanding the debate regarding transpacific connections examining the limits and promises of including these experiences within the conceptual paradigm of the Global South and showcasing different ways of approaching decolonial research to the study of the relationship between East Asia and Latin America
