## **Gardens Of The Caribbean:**

**Gardens of the Caribbean** Jill Collett, Patrick Bowe, 1998 Whether read in the comfort of an armchair or while actually exploring a particular island this beautifully illustrated work of reference is an ideal guide both for the professional horticulturist and keen amateur Written from an historical perspective the book also gives an up to date description of the indigenous plants peculiar to each island and examines the crucial differences in climate and soil It also details the origins of the Botanical Garden and its importance in the protection of rare species A wide selection of gardens is featured which provides a real feel for the diversity of plant life in the region as well as shedding new light on the complexity and beauty of the Caribbean as a whole Islands, Forests and Gardens in the Caribbean Robert S. Anderson, Richard H. Grove, Karis Hiebert, 2006 The continuing struggle to preserve the ecological abundance of the eastern Caribbean is a recurrent theme in this collection of essays on the gardens both botanical and small holdings and the forests of such diverse islands as Martinique St Vincent St Domingue present Haiti and Barbados It pays homage to the indigenous Caribbean people and imported slaves and their descendants who fashioned gardens in remote jungles to achieve both personal dignity and independence from the slave and post slave plantation economy The book s pioneers include botanists and gardeners from many countries who strove to introduce food crops and medicines to the Caribbean for an ever growing population and enlightened local administrators who tried to prevent the rashes of deforestation and its consequent climate changes wherever they could This includes in contemporary times Dr Earle Kirby of Kingstown who has studied and acted on these questions all his life and in whose honour this book is created The contributors essays allow readers to understand the interplay of very local conditions and individual initiatives with larger global dynamics and structures in order for all interested parties to build the environmental institutions needed to protect this region from growing multi national exploitation BOOK JACKET **Beginning Botanical Gardens in the Caribbean** Island Resources Foundation (Virgin Islands of the United States), 1989 **Recovering Caribbean Nature** James A. Kushlan, Kirsten Hines, 2024-10-29 The Caribbean is a global biodiversity hotspot half its resident bird species are found nowhere else yet a quarter are threatened with extinction Nearly all its native amphibians and reptiles and thousands of plants also are endemic Yet less than 1% of the landscape can be considered natural and apart from reserves most land is privately owned Despite the challenges of such habitat fragmentation the Caribbean s distinctive fauna and flora can be preserved through planning and managing a connected network of sustainable naturalistic landscapes reserves parks and private gardens This book uniquely provides both a theoretical background and practical applications to restoring nature within the tropical Caribbean Packed with beautiful color photographs it offers unifying principles that can be applied across the tropics and synthesizes information on the Caribbean s environmental uniqueness and globally significant biodiversity It also provides explicit guidance on establishing sustainable and more naturalistic landscapes from large public lands to private yards and gardens The book is

essential reading for academics and researchers studying the Caribbean environment resource management professionals and scientists and educators from nongovernmental organizations who provide programs and advocacy for conservation and regional sustainability Moreover it highlights the importance of private lands and gardens where the greatest gains can be made and so offers a handbook for knowledgeable private landowners and their professional advisors      **Conservation**
