to Color James Fox takes seven elemental colors black red yellow blue white purple and green and uncovers behind each a root idea based on visual resemblances and common symbolism throughout history Through a series of stories and vignettes the book then traces these meanings to show how they morphed and multiplied and ultimately how they reveal a great deal about the societies that produced them reflecting and shaping their hopes fears prejudices and preoccupations Fox also examines the science of how our eyes and brains interpret light and color and shows how this is inherently linked with the meanings we give to hue And using his background as an art historian he explores many of the milestones in the history of art from Bronze Age gold work to Turner Titian to Yves Klein in a fresh way Fox also weaves in literature philosophy cinema archaeology and art moving from Monet to Marco Polo early Japanese ink artists to Shakespeare and Goethe to James Bond By creating a new history of color Fox reveals a new story about humans and our place in the universe second only to language color is the greatest carrier of cultural meaning in our world Summary of Simon Garfield's Timekeepers Everest Media,2022-06-10T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 When I was cycling with my son we were hit by a car It was just as people had said time seemed to slow down I can remember the fall not exactly in slow motion but extended each tiny event surrounding the accident logged as if it might be my last 2 The brain will try to process the event as quickly as possible because accidents are frightening and significant events But our brains will also create more vivid memories of them which will make them seem like they took longer than they did 3 I was back in a cradle where time was no longer my own I thought about how everything that passed for time in this setting was self imposed and self ordained and I wondered how such an alliance had come about 4 The most famous line in Seneca s essay comes right at the start a reminder of a famous saying by the Greek physician Hippocrates Life is short art is long The exact meaning of this is still open to interpretation but Seneca s employment of the phrase confirms that the nature of time was a topic that thinkers in Ancient Greece and Rome found extremely engaging **Publishers Weekly** ,1985 **The Locomotive Firemen's Monthly Magazine** ,1881 *Love Is Love Is Love* Aaron C. Thomas,2023-03-24 The politics of Broadway musicals matter a great deal more to U S American culture than they appear to mean and they are especially important to mainstream politics surrounding sex gender and sexuality *Love Is Love Is Love* looks to the Broadway musicals of the past decade for help understanding the current state of LGBTQ politics in the United States Through analyses of *Promises Promises* *Newsies* *Hedwig and the Angry Inch* *The Color Purple* and *Frozen* this book attempts to move past the question of representational politics and asks us instead to think in more complex ways about LGBTQ identity what LGBTQ politics are and the politics of Broadway musicals themselves Producing new complex readings of all five of these musicals author Aaron C Thomas places each of them within the context of the LGBTQ politics of their day Some of the issues the book treats are controversies of casting the closetedness and openness of musical theatre LGBTQ identities adaptation from movies into musicals and the special power of the musical form by examining how these shows differ from the books and

movies on which they re based Love Is Love Is Love places contemporary LGBTQ political tensions and conversations in a new light making this an essential companion for students and scholars of contemporary theatre musical theatre cultural studies Queer studies and gender studies Harper's Young People ,1881 **St. Nicholas** Mary Mapes Dodge,1877
