*History of the Processes of Manufacture and Uses of Printing, Gas Light, Pottery, Glass and Iron* William Turner Coggeshall, 2022-03-11 Reprint of the original first published in 1864      **Oil and Gas Implied Covenants for the Twenty-First Century: The Next Steps in Evolution** John Burritt McArthur, 2014-09-01 Oil and Gas Implied Covenants for the Twenty First Century The Next Step in Evolution is the first book in over 75 years to be devoted to the implied covenants that courts apply to oil and gas and other natural resource leases Implied covenants which apply to all oil and gas and other natural resource leases that use a royalty structure are hugely important The United States has reclaimed its position as the world s largest natural gas producer it may soon again become the largest oil producer and the oil and gas industry once again is rapidly growing All this production comes from leased land And the covenants are the basic body of law an oilfield common law developed to carry out the basic purpose of these leases Oil and Gas Implied Covenants features an extended treatment of the issue of greatest controversy in recent years whether the lessee has to bear all costs of making oil or gas marketable or instead can deduct some of those costs from the landowner s interest Oil and Gas Implied Covenants also focuses on the duty to drill additional zones or formations This affects many shale and other unconventional reservoirs the main sources of the surge in oil and gas production over the last decade Many of these leases are being held by older wells producing from conventional reservoirs The implied duty to develop and explore should empower lessors to force drilling into the new unconventional reservoirs too If prices begin to drop and lessees begin cutting back on drilling this duty will end up being a major litigation weapon in the geographic areas into which production is expanding today On another issue that will be vitally important in the future but has received far too little recognition the author surveys the law on environmental cleanup and restoration It is the author s recommendation that lessor and lessee would be better served by treating these issues under a new contract based implied duty to restore rather than the current treatment under the torts of negligence nuisance and trespass The author also recommends that courts consider a new implied duty to disclose material facts and a new duty limiting costs deducted from the royalty share to actual reasonable costs Finally Oil and Gas Implied Covenants illustrates how covenants should apply to hard minerals and other natural resources leased on a royalty structure basis And it identifies the areas where implied covenants should be useful to parties in international arbitration and litigation Thus it points to important new applications of this settled body of law      **The First Five Years Under the Natural Gas Act** United States. *History of Romanian Technology and Industry* Dorel Banabic, 2023-12-18 This volume showcases the valuable achievements of the Romanian technology and industry worldwide It started from the premise that the history of Romanian technique is scarcely known outside the borders of Romania The main Romanian contributions to the world s technological heritage are missing except for a few names in the field of aviation from the great encyclopedias and dictionaries published

worldwide This is due among other reasons to the insufficient promotion in widely spoken languages of the history of Romanian technology The multidisciplinary approach of the volumes means that the field of technology had to be split into several branches The present volume includes the following industries mining metallurgy oil natural gas machine building agricultural machinery military textiles and construction Folk technology the formation of the industrial system and mechanics are tackled in separate chapters For each field are engaged the collaboration of authors who have already published a history of their field Certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for Romania and who are familiar not only with the facts and the history of their field but also with the philosophy behind its development
