Gateway Rotterdam Mainport Of Europe:

Gateway Rotterdam ,1989* **Gateway Rotterdam** Ad. van Krimpen,Wilfried de Jong,1989* **The Urban Connection** Luuk Boelens,2009 The urban connection develops a promising actor relational approach to urban planning With respect to the usual governmental planning it is focused outside in instead of inside out It derives its leitmotif from the actual debate about state controlled versus neo liberal planning and reflects on innovative post structuralist scholars in the field of planning economics social geography and governance It then takes its own position in that debate reflecting on actor oriented experiments in planning practices These experiments deal with the daily planning practice with a pro active and operational attitude contrary to the usual retrospective case studies Therefore it results in concrete suggestions on how to develop a more robust planning approach in an ongoing globalising and fragmenting world Towards the Borderless Mainport Rotterdam H. Arjen van Klink,1995 **Handbook of Ocean Container Transport Logistics** Chung-Yee Lee,Qiang Meng,2014-12-13 This book is focused on the impact of ocean transport logistics on global supply chains It is the first book solely dedicated to the topic linking the interaction of parties along this chain including shippers terminal operators and line carriers While ocean container transport logistics has been greatly studied there are many important issues that have yet to receive the attention they deserve The editors and contributing authors of Ocean Container Transport Logistics Making Global Supply Chain Effective seek to address these topics and shed new light on the subject The book is divided into three parts Part I examines the innovation trends competition and business model of container terminal operations In Part II the book looks at how tactical and operational management is used in shipping liners The chapters cover topics such as empty container repositioning slow steaming routing network design and disruption management Finally Part III explores at shippers and global supply chain management with chapters on transportation service procurement hinterland transportation green corridors as well as competition and co operation in maritime logistics operations The eighteen chapters of the book all highlight the immediate effect of ocean transport logistics on global supply chain *International Trade and Port Logistics* I.C.J. Veraart,2011-11-04 Knowledge of the players and an insight in the logistics processes within international trade and port logistics are vital prerequisites for anyone who operates in international trade or ports or would like to do so for example as a FREIGHT FORWARDER EXPORT PROFESSIONAL or SHIPS AGENT This book discusses and explains the parties involved and the processes in international trade and ports Apart from that the INCOTERMS 2010 payment conditions like the L C and specific subjects such as carrier merchant haulage the business model of the NVOCC container demurrage THC CAF BAF rates and international transport documents like the BILL of LADING are also covered In this book a lot of schemes and figures are used to illustrate reality in a clear concise manner It is intended for anyone who would like to know more about logistics and logistical processes in trade and in and around ports and can be taught in various logistics classes and at different levels of vocational and higher education associate bachelors degree European

European Port Cities and Urban Regeneration Enrico Tommarchi,2022-07-29

Culture and event led regeneration have been catalysts for the transformation of redundant urban port areas and for the reframing of the image of many port cities which notably feature among mega event bidding and host cities However there is little understanding of the impacts of these processes on port city relationships as well as of how port city cultures shape mega events and the related regeneration strategies The book examines the underexplored mutual links between on the one hand urban and socio economic regeneration driven by cultural and sporting mega events and on the other hand the spatial political and symbolic ties between cities and their ports By adopting a cross national comparative perspective with in depth case studies Hull Rotterdam Genoa and Valencia and examples from other port cities across the world where mega events were held the book engages with issues such as the tension between port and cultural uses reactions and opposition to mega events in port cities clashing urban imaginaries drawing on port activity and culture the role of port authorities and companies in the city s cultural life the spectacularisation and commodification of local maritime culture and heritage processes of cultural demaritimisation and remaritimisation of port cities The book is therefore a contribution towards the bridging of port city and mega event studies and it provides insights for port city policy makers and mega event promoters drawing from a range of international experiences The book also shows how societal and political change in the current ontologically insecure times may undermine the very paradigm of culture and event led regeneration in the years to come

Intermodal Freight Terminals Jason Monios, Rickard

Bergqvist,2016-05-20 Much work has been done on port governance yet little has addressed intermodal terminal governance despite the clear similarities This book fills that gap by establishing a governance framework for situating analysis of intermodal terminals throughout their life cycle A version of the product life cycle theory is amended with governance theory to produce a framework covering each stage of the terminal s life cycle from the initial planning to the many decisions taken regarding the public private split in funding mechanisms ownership selecting an operator specifying KPIs to the operator setting fees earning profit ensuring fair access to all rail service operators and finally to reconcessioning the terminal to a new operator managing the handover and maintaining the terminal throughout its life cycle An institutional analysis of stakeholder relations situated within a governance framework illuminates these issues and enables not only conceptualisation and greater understanding of the geography of intermodal transport but also decision making and goal setting by planners and policy makers This book thus has three functions first as a textbook on the planning and operation of intermodal terminals second as a presentation of recent empirical research on intermodal terminal governance third as a framework for future research in which the broad field of analysis of intermodal transport can be viewed through a single lens and used to inform geographers policymakers and planners **Intermodal North America** ,1993 **The**

Netherlands and the Dutch Eduardo F. J. De Mulder,Ben C. De Pater,Joos C. Droogleever Fortuijn,2018-07-28 This book presents a geographical survey of the Netherlands reviewing recent and historic developments that made the nation It is a relatively wealthy country and the Dutch belong to the happiest and healthiest on earth But these qualities are not evenly spread over the country The urban agglomeration of Randstad Holland in the west hosts most of the nation s capital and young well educated people whereas older and less educated people are concentrated in the peripheral areas in the north east and south Interactions between physical and human geographical aspects of the Netherlands are described quite extensively Its position on one of Europe s most prominent deltas its abundance of energy resources and the course of history have all contributed to its present national position and international networks But early and recent Dutch have also shaped this country They reclaimed lakes and shallow seas protected the lowlands against floods re allotted land parcels and designed and developed urban areas Besides its focus on water related topics the book also covers social and cultural aspects The book also discusses future challenges and offers scenarios for solutions This is a book for those interested in a wide variety of recent aspects of the geography of the Netherlands described in a historical context It appeals to students and researchers of many disciplines in geography urban and landscape planning water management history and cultural studies

Responsible Innovation in Large Technological Systems J. Roland Ortt,David van Putten,Linda M. Kamp,Ibo van de Poel,2020-03-04 Large technological systems such as seaports nuclear power stations wind farms and natural gas extraction provide vital functions for society And yet these large technological systems have an impact on different stakeholder groups in both positive and negative ways This book defines responsible innovation and describes how both the innovation process

and the resulting innovation outcome can be designed created and implemented in a way that respects the various stakeholder groups involved and affected by the system Taking a case based approach a number of large technological systems are profiled including hydraulic engineering nuclear energy smart metering and wind power The values of each of the stakeholder groups and the costs and benefits of the systems presented are analysed The book concludes by combining these insights to provide a framework for how responsible innovation of large technological systems can be implemented in practice The book will be of particular interest to undergraduate and postgraduate students and researchers in technology and innovation management and corporate governance CSR and business ethics

Institutional Challenges to Intermodal Transport and

Logistics Jason Monios, 2016-05-23 While the operational realities of intermodal transport are relatively well known the institutional challenges are less well understood This book provides an overview of intermodal transport and logistics including the policy background emerging industry trends and academic approaches Establishing the three key features of intermodal transport geography as intermodal terminals inland logistics and hinterland corridors Jason Monios takes an institutional approach to understanding the difficulties of successful intermodal transport and logistics Key areas of investigation include the policy and planning background the roles of public and private stakeholders and the identification of emerging strategy conflicts Substantial empirical content situates the theoretical and practical issues in real world examples via three detailed case study chapters covering the USA UK and Europe making the book useful to students as well as practitioners desiring an understanding of how intermodal transport and logistics work in practice The identified challenges to intermodal transport and logistics are used to demonstrate how competing port and inland strategies can inhibit the necessary processes of integration required to underpin successful intermodal transport The book concludes with a look at the future of institutional adaptation that may enhance the capacity of freight actors to engage with intermodal transport developments

Airports, Cities and Regions

Sven Conventz, Alain Thierstein, 2014-08-27 Since the emergence of urban systems cities have developed in a mutually inter dependent process of socio economic dynamics and transportation linkages In recent years Airports worldwide have stepped beyond the stage of being pure infrastructure facilities while the complex dynamics that are taking place at and around international airports represent a crucial element in the post industrial reorganisation of urban and regional systems Airports are increasingly recognized as general urban activity centres that is key assets for cities and regions as economic generators and catalysts of investment in addition to being critical components of efficient city infrastructure This book brings together contributions from renowned academic scholars and world leading practitioners to discuss insights gained from theory and practice The first collection of papers reflects upon the general role and future of airports as well as their specific contribution to competitive advantages within a fast changing business and economic landscape The second group of contributions ask about the role airports play within the innovation process that is

inherently centred on generating and sharing knowledge The third section of papers investigates the drivers of real estate developments on airport land and in the close vicinity of airports Europe ,1996 **Aanwinsten van de Centrale Bibliotheek (Queteletfonds)** Bibliothèque centrale (Fonds Quetelet),1995
