development in the human fetus Mondimore reviews current biological research into the nature of sexual orientation and examines recent scientific findings on the role of heredity and hormones as well as Simon LeVay's 1991 brain studies He then turns to a very important focus on people and their individual experiences He explores what happens between childhood and adulthood in an individual that makes him or her come to identify himself or herself as having a sexual orientation He also explains our current understanding of bisexuality and the transgender phenomena of transsexualism and transvestism Finally Mondimore analyzes the circumstances of such prominent scandals as the anti homosexual trials of Oscar Wilde and Philip von Eulenberg and recounts the Nazi persecution of homosexuals during the Holocaust This far reaching discussion includes a description of the ex gay ministries and reparative therapy as well as the Stonewall riots and AIDS ending with the emergence of gay pride and community
