**Bisexuality in Europe** Emiel Maliepaard, Renate Baumgartner, 2020-11-01. *Bisexuality in Europe* offers an accessible and diverse overview of research on bisexuality and bi people in Europe, providing a foundation for theorising and empirical work on plurisexual orientations and identities and the experiences and realities of people who desire more than one sex or gender. Counteracting the predominance of work on bisexuality based in Anglo-American contexts, this collection of fifteen contributions from both early career and more senior academics reflects the current state of research in Europe on bisexuality and people who desire more than one sex or gender. The book is structured around three interlinked themes that resonate well with the international research frontiers of bisexual theorising: bisexual citizenship, intimate relationships and bisexual identities. This book is the first of its kind in bringing together research from various European countries including Austria, Finland, Italy, the Netherlands and Scandinavian countries, as well as from Europe as a wider geographical region. Topics include pansexual identity, non-monogomies, asylum seekers and youth cultures. This is an essential collection for students, early career researchers and more senior academics in Gender Studies, LGBTQI Studies and Sexuality Studies.

*Religion and American Cultures* Gary Laderman, Luis León, 2014-12-17. This four-volume work provides a detailed multicultural survey of established as well as new American religions and investigates the fascinating interactions between religion and ethnicity, gender, politics, regionalism, ethics and popular culture. This revised and expanded edition of *Religion and American Cultures: Tradition, Diversity and Popular Expression* presents more than 140 essays that address contemporary spiritual practice and culture with a historical perspective. The entries cover virtually every religion in modern-day America, as well as the role of religion in various aspects of U.S. culture. Readers will discover that Americans aren't largely Protestant, Catholic or Jewish anymore, and that the number of popular religious identities is far greater than many would imagine. And although most Americans believe in a higher power, the fastest growing identity in the United States is the none: those Americans who elect none when asked about their religious identity, thereby demonstrating how many individuals see their spirituality as something not easily defined or categorized. The first volume explores America's multicultural communities and their religious practices, covering the range of different religions among Anglo-Americans and Euro-Americans, as well as spirituality among Latino, African American, Native American and Asian American communities. The second volume focuses on cultural aspects of religions, addressing topics such as film, Generation X, public sacred spaces, sexuality and new religious expressions. The new third volume expands the range of topics covered with in-depth essays on additional topics such as interfaith families, religion in

prisons belief in the paranormal and religion after September 11 2001 The fourth volume is devoted to complementary primary source documents
