Participation by 16-19 year olds in education and training Great Britain: Parliament: House of Commons: Education Committee,2011-07-19 The Education Committee accepts that changes to student support needed to be made but says that the delay in deciding on allocations and the guiding principles for distribution should not have been allowed to happen The report states that the Government should have done more to acknowledge the Educational Maintenance Allowance s EMA combined impact on participation attainment and retention before it decided how to restructure financial support The bursary scheme which is to replace the EMA will inevitably lead to inconsistencies which could distort young people s choices of where to study It is not persuaded that bursaries administered by schools and colleges will necessarily be fairer or more discriminating than a slimmed down more targeted entitlement such as the EMA The report also highlights the difficulty of transferring data between schools and colleges and encourages the Department for Education to do more to ensure that information about pupils needs can move easily between educational institutions The Committee supports the Government s focus on Apprenticeships but urges it to protect quality at the same time as increasing numbers participating It also urges the Department for Education to fund the National Careers Service to provide face to face careers advice for young people

Implementing E-government Gloria Evans,2003 In this report written for civil servants and their advisors Gloria Evans presents information on how to implement the translation of government services and information on to the Internet

Training of teachers Great Britain: Parliament: House of Commons: Children, Schools and Families Committee,2010-02-09 Major reforms must be introduced to help newly qualified teachers make the transition from their initial training to their first teaching post The pressures on teachers at the start of their careers are considerable and the Committee calls for measures that reduce the front loaded nature of teacher training Much greater space and incentives for early career teachers to supplement initial training with a relevant masters qualification are vital Mentoring support for

these teachers must be improved and extended The Committee urges radical changes to teacher professional development including the introduction of a single overarching framework for the management of teachers career progression It says the Chartered Teacher framework would encompass a licence to practise and link pay and progression to the completion of a masters qualification and thereafter to completion of further accredited training Entry requirements for much initial teacher training provision are too low and the bar must be raised Reforms should include discontinuing undergraduate programmes for those wanting to be secondary school teachers which attract the poorest qualified candidates and requiring postgraduate trainees to have a lower second degree or above The Committee also says that supply teachers must be brought into the mainstream of the profession that in the context of the 14 19 reforms school and further education teachers should have much greater mobility across the two sectors and that the training of early years school and further education teachers should be harmonised through generic standards

The English Baccalaureate Great Britain: Parliament: House of Commons: Education Committee,2011-07-28 This report suggests that any new performance or curriculum measures affecting schools should only be implemented after proper consultation with key stakeholders and the wider public something which didn t happen with the English Baccalaureate EBac The Committee says that the Government should also have waited until after the conclusion of the National Curriculum Review before introducing the EBac They want the Government to deliver on its promise in the White Paper The Importance of Teaching to use performance tables to put greater emphasis on the progress of every child The report notes that certain academic subjects studied at A level are more valued by Russell Group universities than others but argues that a focus on a fairly narrow range of subjects demanding considerable curriculum time is likely to have negative consequences on the uptake of other subjects The Committee does not make recommendations on which subjects should or should not be included but rather encourages the Government to reconsider the EBac s composition when the National Curriculum Review is concluded The Government should confirm how it will monitor the attainment of children on free school meals in the EBac The report also calls for further international evidence to inform debate on the merits of the EBac evidence the inquiry received did not suggest a link in other countries between the prescribed study of certain academic subjects and improved attainment and prospects for poorer students Elsewhere the report argues that the current arrangements for certification of the EBac should be shelved as should calls for a Technical Baccalaureate to sit alongside the existing award
