Innovations they developed have become part of global accounting standards The story is told in the words of three board members all of whom had spent their careers in accounting one as a senior technical partner of a Big 4 audit firm one as an executive in major multinational businesses one as a university professor respectively the Chairman Sir David Tweedie the Technical Director Allan Cook and the academic board member Professor Geoffrey Whittington The medium is for the most part conversation with the standard setters questioned by Cambridge Professor Geoff Meeks recorded over three years producing a more vivid picture of motivations and events Also in this technically demanding subject it has the advantage of a simpler more informal and engaging conversational style and language The book will appeal not just to accountants interested in the origins of the rules they are following and students learning why those rules were adopted but also to anyone interested in how in spheres beyond accounting to harness the expertise and support of business regulatees without suffering regulatory capture
