Lee Stewart

Gordon Shrum An Autobiography As Told To Peter Stursberg:

Gordon Shrum Gordon Shrum, Peter Stursberg, 2011-11-01 Fearsome tireless dynamic a master builder and management superstar the late Dr Gordon Shrum was all of these He was also a man who achieved more after age sixty five than most do in their entire lives and who until his death at age ninety in 1985 was widely considered the greatest living British Columbian This autobiography traces Shrum's beginnings on a southern Ontario farm through his school and university years in Toronto his distinguished academic career at UBC and his post retirement careers as chancellor of Simon Fraser University head of B C Hydro Robson Square and the Vancouver Museum Radical Campus Hugh Johnston, 2009-09-01 This engaging history of a university and an era traces the formative years of Simon Fraser University in Burnaby BC SFU was born in a period of ferment and flux when ideas about education were changing so rapidly and the western world was starting to feel the impact of student activism the Civil Rights movement and opposition to the Vietnam War Promoted as an open innovative university SFU attracted more mature students and far younger and more idealistic faculty than other schools The stage was set for educational and political fireworks Radical Campus traces those first exhilarating confusing and profoundly educational years from the search for an architect who could produce an extraordinary design to the hiring of young professors from all over the world to the uproar caused when Chancellor Gordon Shrum declared himself against tenure for faculty All contributed to SFU's reputation as a radical difficult obstreperous place In fact the university rapidly became a lightning rod in an unforgettably creative era in post secondary education in the Western world From the tumult of its first years SFU has emerged to become one of Canada's most respected universities youthful energetic regorous and still growing and learning White Gold Karl Froschauer, 2011-11-01 During the past fifty years Canadians have seen many of their white water rivers dammed or diverted to generate electricity primarily for industry and export The rush to build dams increased utility debts produced adverse consequences for the environment and local communities and ultimately resulted in the layoff of 25 000 employees White Gold looks at what went wrong with hydro development with the predicted industrial transformation with the timing and magnitude of projects and with national and regional initiatives to link these major projects to a trans Canada power grid Karl Froschauer examines five major hydroelectric projects Niagara Falls Ontario Churchill Falls Labrador James Bay Quebec the Nelson River Manitoba and the Peace River British Columbia applying a political economic perspective that unifies his analysis of patterns of hydro development in Canada He points out that in the 1960s and 70s federal and interprovincial conflicts over transmission line ownership hydro plant investments extra provincial authority and export agendas undermined several national and regional power grid initiatives He then argues that if the provinces had chosen to integrate their power project within a national electricity network substantial technical economic and environmental advantages could have resulted Instead of providing the infrastructure for a national power grid and serving as a force for indigenous secondary industry the provincial

expansions of Canada's hydro resources have merely fostered continued dependence on branch plant industrial development and staples export and have created vast surpluses of electricity for continental rather than national use Meticulously researched and documented *White Gold* is the first comprehensive study of hydroelectric power development in Canada Its useful analytical framework and provincial comparisons illuminate and critique the path of development over the last century and offer lessons for the future

Sustaining the West Liza Piper, Lisa Szabo-Jones, 2015-04-06 Western Canada's natural environment faces intensifying threats from industrialization in agriculture and resource development social and cultural complicity in these destructive practices and most recently the negative effects of global climate change The complex nature of the problems being addressed calls for productive interdisciplinary solutions In this book arts and humanities scholars and literary and visual artists tackle these pressing environmental issues in provocative and transformative ways Their commitment to environmental causes emerges through the fields of environmental history environmental and ecocriticism ecofeminism ecoart ecopoetry and environmental journalism This indispensable and timely resource constitutes a sustained cross pollinating conversation across the environmental humanities about forms of representation and activism that enable ecological knowledge and ethical action on behalf of Western Canadian environments yet have global reach Among the developments in the contributors construction of environmental knowledge are a focus on the power of sentiment in linking people to the fate of nature and the need to decolonize social and environmental relations and assumptions in the West

Academic Freedom in Canada Michiel Horn, 1998-01-01 Covering issues from the resistance in universities to Darwinist thought to the experience of women and ethnic minorities to economic and political correctness from 1860 to the present

A Long Way to Paradise Robert A.J. McDonald, 2021-10-15 The political landscape of British Columbia has been characterized by divisiveness since Confederation As outsized personalities from Amor De Cosmos to W A C Bennett dominated the halls of power militant radicals and reformers took to the streets and hustings *A Long Way to Paradise* traces the evolution of political ideas from 1871 to 1972 to explore British Columbia's journey to socio political maturity answering both why and how British Columbia became Canada's most fractious province Robert McDonald explains its classic left right divide as a product of common sense liberalism that also shaped how British Columbians met the challenges of a modernizing world McDonald tackles key questions Why were the Liberal and Conservative parties obliterated in the 1950s What can account for Bennett's decades long reign And why did parties as diametrically opposed as Social Credit and the NDP succeed This lively overview provides fresh insight into the fascinating story of provincial politics in Canada's lotus land

Physics and the Rise of Scientific Research in Canada Yves Gingras, 1991-03-01 The teaching of engineering and a change in liberal arts curricula both stimulated by industrial growth encouraged the creation of specialized courses in the sciences By the 1890s Gingras argues trained researchers had begun to appear in Canadian universities The technological demands of the First World War and the founding in 1916 of the National Research Council of Canada NRC accelerated the growth of

scientific research The Transactions of the Royal Society of Canada could no longer publish everything submitted to it because of the disproportionately large number of research papers from the fields of science In response the NRC created the Canadian Journal of Research a journal specifically dedicated to the publication of scientific research By 1930 a stable national system of scientific research was in place in Canada Following the dramatic increase in the national importance of their disciplines scientists faced the problem of social identity Gingras demonstrates that in the case of physics this took the form of a conflict between those who promoted a professional orientation necessary to compete successfully with engineers in the labour market and those mainly in the universities who were concerned with problems of the discipline such as publication internal management and awards Physics and the Rise of Scientific Research in Canada is the first book to provide a general analysis of the origins of scientific research in Canadian universities Gingras proposes a sociological model of the formation of scientific disciplines distinguishing the profession from the discipline two notions often confused by historians and sociologists of science

Ron Thom, Architect Adele Weder, 2022-09-13 A definitive biography of an iconic Canadian architect and a social portrait of the midcentury design world he lived in Ron Thom came of age in the mid 20th century just as the modern movement and an impending building boom were about to reshape the country Talented in music and art as well as design he rejected sleek austerity in favor of modern architecture that is warm intimate and beautiful He worked from coast to coast and his most renowned buildings Massey College Trent University the Shaw Festival Theatre and landmark houses continue to inspire generations of architects as well as the legions of people who work study visit and live in them In Adele Weder's new biography Thom emerges as a complex figure gifted with creative genius but pursued by demons More than just the life story of one man this book is a portrait of the society that shaped him His world included Jack Shadbolt Arthur Erickson the Massey family Barbara and Murray Frum and many other luminaries of 20th century Canada To unpack this multifaceted story Weder pored through institutional and personal archives in Victoria Vancouver Calgary Montreal Peterborough and Toronto She tracked down and interviewed Thom's surviving friends colleagues and family members across the country from New Brunswick to Vancouver Island Her extensive research serves as the bedrock for Ron Thom Architect a book for anyone interested in a transformative era in Canada's cultural history

It's Up to You Lee Stewart, 2011-11-01 Lee Stewart argues in this book that the notion of university education as a cultural entitlement inherent in the literal translation of the University of British Columbia's motto Tuum Est as It is yours has always been more applicable to male than to female students Conversely the popular interpretation of Tuum Est It's up to you has held greater significance for women Stewart examines the demands accomplishments and limitations of women advocates and educators against the background of the social and cultural conditions which enveloped them The book profiles the experience of women at UBC from the founding of the university early in this century until after the Second World War Stewart argues that campaigns to open the university to start nursing and home economic programs to establish the office of dean of women and

to build women's residences each involved the persistent efforts of women reformers and each eventually succeeded. At the same time pragmatism, politics and expedience far more than a passion for feminism within the university or in the province accounted for the form that these programs and institutions took. Stewart also describes the experience of female students and the strategies they devised to participate fully in the academic, cultural and political life of the university. Young women had to juggle the contradictory expectations of the academic and social communities. In describing this process the author consciously links women's experience to the history of the university itself. Stewart makes an important contribution to our understanding of higher education and to the history of a major Canadian university. She also expands our sensitivity to women's changing role in the twentieth century.

Making a Middle Class Paul Axelrod, 1990. Using a rich array of archival and quantitative sources and oral testimony from ex-students across Canada, Axelrod explores the characteristics and significance of university life during a trying decade. He describes who went to university, what they were taught, how they amused themselves, how they responded to the pressing political issues of the day and what became of them after graduation. Axelrod argues that these students shared the aspirations of middle-class communities elsewhere. Dreading the prospect of downward social mobility, they craved the status a university degree and professional credentials might produce. Accordingly, they forged an associational life on campus that challenged the control of paternalistic authorities, perpetuated the values of middle-class culture and helped them cope with the stresses of the time. Women composed almost one-quarter of the student population and faced discrimination inside and outside the classroom. How they coped with this, how they adapted their own expectations and how they contributed to campus and community culture are extensively discussed. Through the prism of the student experience, *Making a Middle Class* furnishes fresh insights into the social history of higher education, the history of youth, the history of the middle class and the history of the Depression.

Fish versus Power Matthew D. Evenden, 2004-05-03. *Fish versus Power* is an environmental history of the Fraser River, British Columbia, and the attempts to dam it for power and to defend it for salmon. Amid contemporary debates over large dam development and declines in fisheries, this book offers a case study of a river basin where development decisions did not ultimately dam the river but rather conserved its salmon. Although the case is local, its implications are global as Evenden explores the transnational forces that shaped the river, the changing knowledge and practices of science and the role of environmental change in shaping environmental debate. The Fraser is the world's most productive salmon river; it is also a large river with enormous waterpower potential. Very few rivers in the developed world have remained undammed. On the Fraser, however, fish not dams triumphed and this book seeks to explain why.

Canadian Books in Print 2002 Marian Butler, 2002-02. **Canadian Books in Print**, 2003. *Canadians*, 1986. *B C Studies*, 1987. ***Delusions of Power*** Wayne Skene, 1997. *A.C.U. Bulletin of Current Documentation*, 1984. ***America, History and Life***, 1988. Provides historical coverage of the United States and Canada from prehistory to the present. Includes information abstracted from over 2,000 journals published worldwide. **CM**

,1987 *Encyclopedia of British Columbia* Daniel Francis,2000 The BC publishing event of the decade 30 000 copies in print
