culture visual arts performance studies and literary analysis Embracing the East was the winner of the 2003 Hiroshi Shimizu Award of the Japanese Association for American Studies best book in American Studies by a junior member of the association

Material Culture Kenneth L. Ames, 1985 Magnificent, Marvelous Martelé John Webster Keefe, Samuel J. Hough, 2001 The Martele line of handwrought silver in the Art Nouveau style by the Gorham Manufacturing Company is justly regarded as a major expression of that style on this side of the Atlantic Ocean Officially introduced at the influential Paris Exposition Universelle of 1900 Martele silver was widely admired and was awarded a Grand Prix and many gold medals The excitement created then by the new artistic line of Martele silver has been rekindled by this premiere exhibition of nearly three hundred works from the collection of Jolie and Robert Shelton The mammoth and highly regarded Gorham Company developed from a small jewelry manufactory founded by Jabez Gorham 1792 1869 in Providence Rhode Island to the world s largest producer of sterling silver wares In the process of this growth the company distinguished itself by successfully combining new technological advances in the industry with exemplary design So successful was Gorham in the closing years of the nineteenth century that it could devote considerable time money and expertise to create an art line of hollowware produced entirely by hand The new line in the latest cutting edge taste departed dramatically from Gorham s flourishing line of machine made commercial flat and hollowwares It was named Martele from the French verb *marteeler* the hammer The line probably never would have come into existence without the driving influence and vision of two men Gorham s energetic chief executive Edward Holbrook 1849 1919 and its chief designer William Christmas Codman 1839 1923 To connoisseurs of silver Codman is justly renowned for the development of the lavish Martele line starting with designs in 1896 and commencing a limited production in 1897

Savory Suppers and Fashionable Feasts Susan Williams, 1996 *Savory Suppers and Fashionable Feasts* offers a delightfully flavorful tour of dining in America during the second half of the nineteenth century Susan Williams investigates the manners and morals of that era by looking at its eating customs and cooking methods As she reveals genteel dining became an increasingly important means of achieving social stability during a period when Americans were facing significant changes on a variety of fronts social cultural intellectual technological and demographic Focusing on the rapidly expanding middle class Williams not only examines mealtime rituals but she looks at the material culture of Victorian dining the furniture the furnishings and the growing array of accouterments from asparagus tongs to sardine servers and lace doilies that supported genteel expectations for table side behavior She also explores changing ideas about meals how they fit into the daily schedule and what kinds of food and drink came to characterize specific meals and menus Complementing Williams analysis and descriptions is a lavish

array of illustrations as well as a rich sampling of recipes from the diaries and cookbooks of the era The result is at once an informative look at life in Victorian America and a sumptuous celebration of a key moment in the country's culinary experience For this new paperback edition Williams has updated the bibliography and included a new introduction that summarizes trends and advances in the study of dining since the book's first publication in 1985 *American Studies* Jack Salzman, 1986-08-29 This is an annotated bibliography of 20th century books through 1983 and is a reworking of *American Studies An Annotated Bibliography of Works on the Civilization of the United States* published in 1982 Seeking to provide foreign nationals with a comprehensive and authoritative list of sources of information concerning America it focuses on books that have an important cultural framework and does not include those which are primarily theoretical or methodological It is organized in 11 sections anthropology and folklore art and architecture history literature music political science popular culture psychology religion science technology medicine and sociology Each section contains a preface introducing the reader to basic bibliographic resources in that discipline and paragraph length non evaluative annotations Includes author title and subject indexes ISBN 0 521 32555 2 set 150 00 **America at the Fair** Chaim M. Rosenberg, 2008-02-25 At the time of the World's Columbian Exposition of 1893 the United States was fast becoming the world's leading economy Chicago the host city had grown in less than half a century from a village to the country's second largest metropolis During this the Gilded Age the world's most extensive railroad and steamship networks poured ceaselessly through Chicago carrying the raw goods and finished products of America's great age of invention and industrial expansion The Fair was the largest ever at the time with 65 000 exhibitors and millions of visitors It has been called the Blueprint of the American Future and marked the beginning of the national economy and consumer culture **Endless Novelty** Philip Scranton, 2000-07-23 Flexibility specialization and niche marketing are buzzwords in the business literature these days yet few realize that it was these elements that helped the United States first emerge as a global manufacturing leader between the Civil War and World War I The huge mass production based businesses steel oil and autos have long been given sole credit for this emergence In *Endless Novelty* Philip Scranton boldly recasts the history of this vital episode in the development of American business known as the nation's second industrial revolution by considering the crucial impact of trades featuring specialty not standardized production Scranton takes us on a grand tour through American specialty firms and districts where for example we meet printers and jewelry makers in New York and Providence furniture builders in Grand Rapids and tool specialists in Cincinnati Throughout he highlights the benevolent as well as the strained relationships between workers and proprietors the lively interactions among entrepreneurs and city leaders and the personal achievements of industrial engineers like Frederic W Taylor Scranton shows that in sectors producing goods such as furniture jewelry machine tools and electrical equipment firms made goods to order or in batches and industrial districts and networks flourished creating millions of jobs These enterprises relied on flexibility skilled labor close interactions with clients

suppliers and rivals and opportunistic pricing to generate profit streams They built interfirm alliances to manage markets and fashioned specialized institutions trade schools industrial banks labor bureaus and sales consortia In creating regional synergies and economies of scope and diversity the approaches of these industrial firms represent the inverse of mass production Challenging views of company organization that have come to dominate the business world in the United States Endless Novelty will appeal to historians business leaders and to anyone curious about the structure of American industry
