Handbook Of Mental Health And Aging:

Handbook of Mental Health and Aging James E. Birren, Gene D. Cohen, R. Bruce Sloane, Barry D. Lebowitz, Donna E. Deutchman, May Wykle, Nancy R. Hooyman, 2013-10-22 This book is a thorough revision of one of the most comprehensive reference volumes for persons working in the area of aging and mental health. The thrust of the work is interdisciplinary and discusses research on both clinical and practical issues in aging and mental health. The multidisciplinary nature of this book and the inclusion of subject matter from the professional as well as research realm result in a level of comprehensiveness which is distinct in the field of mental health and aging. Each chapter contains a comprehensive bibliography, the compilation of which represents a definitive reference source in the field. The chapters review state of the art research in the biological, behavioral, and social sciences and represent the cutting edge of current practice in psychiatry, neurology, social work, nursing, psychology, and pharmacology among other professions. The compilation of prevalence data is a much needed addition to the current literature. The multidisciplinary nature of this book and the inclusion of both clinical and practical issues makes the book distinctively comprehensive.

The Praeger Handbook of Mental Health and the Aging Community Doreen Maller, Kathy Langsam, 2017-11-27 A comprehensive book written by experienced practitioners, this single volume work describes clinical competencies, specific challenges, and applications in providing services to the elderly and their caregivers. More people are living past age 65 than ever before in the United States, largely due to medical care advances and increased attention to preventive care. The number of people aged 65 and older has increased from 35 million in 2000 to 40 million in 2010, and the elderly population is expected to reach 72 million by 2030. Additionally, the American Psychological Association estimates that at least 20 percent of all people aged 65 and older have a diagnosable mental disorder. There is a clear need to provide additional training support to those in the field of elder care as well as those who are friends or family members of older adults. Written by a team of experts, each specializing in an aspect of elder care, *The Praeger Handbook of Mental Health and the Aging Community* is a single volume text that addresses the training needs of mental health care providers serving the aging population. It offers holistic and integrated models of care after presenting an in-depth explanation of the brain-body-social and emotional changes across aging that can trigger psychological disorders. The chapters pay attention to issues of diversity and culture in America's aging population, present an integrated care model to serve all of the needs of mentally ill elders, include numerous case studies to demonstrate how approaches can be utilized, and discuss topics such as disability, poverty, and the legal and ethical ramifications of elder care.

today **Handbook of Behavioral and Cognitive Therapies with Older Adults** Dolores Gallagher Thompson, Ann Steffen, Larry W. Thompson, 2007-10-12 It gives me great pleasure to witness continued growth in the application of cognitive and behavioral theories and therapies to more diverse populations including in this volume their application to the mental health problems of later life Evidence continues to accumulate demonstrating that these are effective in treating a broad range of elderly patient groups This is the first book to examine a number of these evidence based interventions currently in use with older adults The editors have assembled chapters developed in many of the leading clinical and clinical research programs focusing on elderly patients both in this country and in the UK Since the emphasis of this volume is primarily on clinical application each author group was asked to discuss the empirical data for the treatment strategies it is using with the specific patient group selected Typically this was followed by a detailed description of treatment procedures that were then illustrated by one or more clinical examples The book begins by examining the treatment of depressive and anxiety disorders and then moves on to more complicated and/or serious disorders including schizophrenia and other psychoses suicidal behavior personality disorders bipolar disorders dementia and complicated bereavement A chapter on the problems and issues in training therapists to use evidence based interventions effectively is also included along with a chapter discussing the implications of Medicare policies and guidelines for service delivery Readings in the Political Economy of Aging Meredith Minkler, Carroll Estes, 2019-03-19 Includes 16 essays which address many issues from a different perspective suggested by the experience of aging in America This study explores the political social and economic realities which have an impact on Americans as they grow older **Aging** Lewis R. Aiken, 1995 The aging process is a complex sometimes mysterious evolution we will all experience In this interdisciplinary text author Lewis R Aiken acquaints you with the elements and effects influencing people in the later stages of life Beginning with an historical overview of gerontology Aiken discusses both pragmatic and philosophical concerns within the field Factors impacting the process and results of aging are carefully outlined and explicated these address such areas as biology psychology sociology economics and politics The interpersonal variability of the older population is stressed throughout the book recognizing gender ethnic racial and cultural differences Each chapter concludes with a thorough review of the material covered a series of questions and activities designed to enhance the learning experience and a list of suggested readings that expand on the topics being discussed Clearly written authoritative rich in information and integration of research material in a wide range of disciplines Aging An Introduction to Gerontology is valuable for undergraduate certificate and community college programs in gerontology as well as graduate courses in applied professional disciplines The book makes a contribution to the field it is a praiseworthy effort and it has substantive merit It reveals competence good grasp of the subject matter and a very good integration of research material in a wide range of disciplines The information is generally very much up to date and relevant It constitutes the right introduction for people interested to learn about the field of gerontology The text is lucid clearly written and easy to read It is

definitely well attuned to its targeted audience. It introduces technical terminology with all the proper caveats and facilitates its comprehension with a glossary. Abraham Monk, School of Social Work, Columbia University. This is a basic textbook of human gerontology that comprehensively covers aging and the aged with a special emphasis on the psychology of aging. The purpose is to review what is known about aging and older adulthood, the methods by which this information is obtained, and to provide practical guidelines for dealing with the problems of an aged population. The author meets these goals very well. This book is written for undergraduate and graduate students. Even geriatricians in training will find this a lucid exposition of human gerontology. This book's well-organized chapters are clearly illustrated. There are boxes that highlight concepts and a list of further readings in addition to well-cited references. At the end of each chapter, there are questions and exercises. This textbook is a welcome addition to the field. It is very well written and organized. Both teachers and students will enjoy using this textbook. Rating: 98. Doody's Health Sciences Book Review Journal. Aging is rich in information and integration of research material in a wide range of disciplines and valuable for undergraduate certificate and community college programs in gerontology and as well graduate courses in applied professional disciplines.
