the correct direction to engage in the optimal management of the ocular condition and thus relieve the patient's signs and symptoms and possibly improve the way the patient sees the world. All these clinical activities are often performed within a very narrow time slot with limited chair time for the individual patient. It is of paramount importance to maximally utilize this limited time segment to deliver the best possible care to our patients. At the same time it is important not to compromise eye care at the expense of speed. Hence a clinician often needs the diagnostic and therapeutic reference materials that can be used in a short time to answer his clinical questions. With this in mind the text is written in an easy to read quick reference format while at the same time providing an extensive and most comprehensive material that the clinician will find extremely useful. Also practical images are inserted throughout the text to complement the process of clinical patient care. This book helpful for practising ophthalmologists and students
