Evaluating Service Learning Activities and Programs David A. Payne, 2000 Uses an extended case study to guide teachers through evaluation of service learning outcomes and their relevance to the curriculum Covers the evaluation process from question formulation to instrumentation data collection and application Current professional practices are

emphasized throughout Includes a list of state organizations supporting service learning and some 40 pages of sample checklists and forms Payne is director of Test Scoring and Reporting Services and professor of educational psychology at the University of Georgia Annotation copyrighted by Book News Inc Portland OR **The Program Evaluation Standards** Joint Committee on Standards for Educational Evaluation, James R. Sanders, 1994-04-06 The Program Evaluation Standards is a must have book for anyone responsible for reviewing evaluation proposals planning and conducting evaluations managing evaluation projects or judging the merit and worth of evaluations once completed For experienced practitioners it provides a set of values and principles by which to guide successful practice that is a set of criteria that determines whether educational evaluations are trustworthy and fair The Standards sets expectations of the design and implementation of educational evaluation for all practitioners in all types of educational arenas even those involved in social programming endeavors For newcomers and those less experienced who may be responsible for commissioning and using evaluations the Standards supplies a useful framework of generating a list of questions to raise about any evaluation plan or final report in an effort to assess its pros and cons The book is an invaluable how to resource for graduate students venturing out into the field and it instills a sense of what it means to be a responsible evaluator For clients or consumers the book offers advice on what they should expect of an evaluation Publisher description **Training for Organizations** Bridget N. O'Connor, Michael Bronner, Chester Delaney, 2002 This conceptual text is designed to give an overview of the training process and training careers The focus is on needs analysis and the planning for the evaluation of training Interviews with training professionals make the text effective for both practitioners in the corporate training environment and instructors in the classroom

Educational Research Evelyn J. Sowell, 2001 Are your beginning students sometimes overwhelmed by the prospect of reading research articles or writing a research proposal Does the notion of educational research make them anxious to begin with Is research a mystery to them This text will help Educational Research An Integrative Introduction is a brief basic paperback alternative to the typically long weighty hardcover educational research tome It takes a practical approach to educational research for beginning students Students who study its chapters critically learn to read research reports and to produce a proposal for their own research project Nine complete research reports in Appendix A provide illustrations of major ideas in the text chapters and are used in the end of chapter exercises The reports read include experimental descriptive qualitative and historical approaches The book presents qualitative and quantitative research as complementary approaches to educational research **Resources in Education** , 1994-10 Multilevel Modeling of Social Problems Robert B. Smith, 2011-02-26 Uniquely focusing on intersections of social problems multilevel statistical modeling and causality the substantively and methodologically integrated chapters of this book clarify basic strategies for developing and testing multilevel linear models MLMs and drawing causal inferences from such models These models are also referred to as hierarchical linear models HLMs or mixed models The statistical modeling of multilevel data structures enables researchers

to combine contextual and longitudinal analyses appropriately But researchers working on social problems seldom apply these methods even though the topics they are studying and the empirical data call for their use By applying multilevel modeling to hierarchical data structures this book illustrates how the use of these methods can facilitate social problems research and the formulation of social policies It gives the reader access to working data sets computer code and analytic techniques while at the same time carefully discussing issues of causality in such models This book innovatively Develops procedures for studying social economic and human development Uses typologies to group i e classify or nest the level of random macro level factors Estimates models with Poisson binomial and Gaussian end points using SAS s generalized linear mixed models GLIMMIX procedure Selects appropriate covariance structures for generalized linear mixed models Applies difference in differences study designs in the multilevel modeling of intervention studies Calculates propensity scores by applying Firth logistic regression to Goldberger corrected data Uses the Kenward Rogers correction in mixed models of repeated measures Explicates differences between associational and causal analysis of multilevel models Consolidates research findings via meta analysis and methodological critique Develops criteria for assessing a study s validity and zone of causality Because of its social problems focus clarity of exposition and use of state of the art procedures policy researchers methodologists and applied statisticians in the social sciences specifically sociology social psychology political science education and public health will find this book of great interest It can be used as a primary text in courses on multilevel modeling or as a primer for more advanced texts
