Proper care and maintenance of textile materials is essential in prolonging their durability and appearance. This book describes methods of care and maintenance for textile products, focusing on types of laundering and dry cleaning processes, chemicals, and equipment, while considering the environmental impacts of these procedures and green cleaning approaches. It details care labelling of garments, including electronic care labelling and instructions for different specialty textiles. Factors such as pilling, abrasion, snagging, color fading, and dimensional change are discussed. This book also emphasizes care and maintenance of textiles used for protection from fire, bullets, cold weather, and chemicals.  
**Advanced Technology in Textiles** Md. Mizanur Rahman, Mohammad Mashud, Md. Mostafizur Rahman, 2023-06-16  
This book highlights the latest technology in textile processing along with the application of eco-friendly chemicals and reagents. As textile is the second basic human need, this industry assimilates a large share in the world economy. Nonetheless, nothing should be accomplished compromising sustainability; therefore, updated technology and modern machineries are being used in the textile processing. It is not only for enhancing the efficiency but also to reduce waste and energy consumption. Moreover, Nano particles and Bio chemicals are assumed to become an integral part in the future manufacturing system. In this book, the numerical and investigation results will be presented to highlight the mentioned topics so that the application is lucidly comprehended. In a nutshell, this book is supposed to cover all the vibrant innovations in the manufacturing arena in textiles in consideration with ecological balance as well as breakthroughs in applied technology assumed to veer the general concept of maintenance of that machineries.  
**Textiles for Advanced Applications** Bipin Kumar, Suman Thakur, 2017-09-20  
This book presents a global view of the development and applications of technical textiles with the description of materials, structures, properties, characterizations, functions, and relevant production technologies, case studies, challenges, and opportunities.
