 C. Eckelman, 2012-12-06 The editors have asked me to write this foreword probably for two reasons First I have spent 35
 years trying to develop radiolabeled compounds that would help diagnose and treat disease I and the people from my
 laboratory have been much involved with developing Nan I for the diagnosis and treatment of hyperthyroidism and well
 differentiated thyroid cancer Second I was a participant throughout the entire symposium upon which this book is based Our
 latest 311 labeled compound I311 metaiodobenzylguanidine took us 13 years to develop It has succeeded in diagnosing and
 treating adrenergic tumors 31 under circumstances where Na 1 would have failed for the diagnosis and treatment of thyroid
 cancer I therefore hope that more scientists will be attracted to this field This book is written by intelligent experienced
 investigators who are knowledgeable It is a must for anyone new in the field For the experienced I would like to remind you
 that I attended the entire symposium the breadth and timeliness of the update has helped us to redirect some of our current
