Archaeologist's Manual for Conservation Bradley A. Rodgers, 2007-05-08 This is a Foreword by an archaeologist not a conservator but as Brad Rodgers says Conservation has been steadily pulled from archaeology by the forces of specialization p 3 and hewantstoremedy that situation through this manual He sees this work as a call to action for the non professional conservator permitting curators conservators and archaeologists to identify artifacts that need professional attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using simple non toxic procedures

p 5 It is the mission of Brad's manual to bring conservation back into archaeology p 6 The degree of success of that goal depends on the degree to which archaeologists pay attention to and put to use what Brad has to say because as he says The conservationist archaeologist is responsible to make preparation for an artifact's care even before it is excavated and after its storage into the foreseeable future a tremendous responsibility p 10 The manual is a combination of highly technical as well as common sense methods of conserving wood iron and other metals ceramics glass and stone organics and composites a far better guide to artifact conservation than was available to me when I first faced that archaeological challenge at colonial Brunswick Town North Carolina in 1958 a challenge still being faced by archaeologists today The stage of conservation in 1958 is in dramatic contrast to the procedures Brad describes in this manual conservation has indeed made great progress For instance a common procedure then was to heat the artifacts red hot in a furnace a method that made me cringe *Conservation and Exhibitions* VASTA, 2013-10-22 Conservation and Exhibitions Packing Transport Storage and Environmental Considerations presents the theory and practice in exhibitions conservation The book aims to promote better conservation practices and less wear and tear of works of art Topics discussed in the book include conservation principles examining and reporting a work of art's structural stability preparation and handling and storage Traditional and newer packing techniques case and container design and construction transportation modes strategies and equipment and loan agreements and insurance are also covered in detail Conservator practitioners exhibition organizers technicians and transportation specialists will find the book very useful *A Graphic Guide to Art Therapy* Amy E.
