colonial legacies it was the archetype trading emporium between East and West and it became for the British the major point of support for defence. Finally the Singapore colonial narrative is set in a broader academic discourse that allows the reader to see a wider picture of Singapore's colonial development. The book does not attempt to make a definitive statement about the Western involvement in Singapore; it deals more with an association of many subjective Western perspectives that add colour to the liveability of the tropics, perceptions of the exotic Orient and the myriad views of ethnic groups. Without the Western writings, paintings and maps, academia would have minimal records of Singapore's development. As a new colony in the early 19th century, however, Singapore's growth has been extremely well documented. This book will appeal to Singaporeans interested in understanding Singapore's colonial past, Westerners interested in the Western cultural persona in the development of Singapore, researchers dealing with the urban development of less developed countries and colonial development in the tropical world and lastly academics who are interested in Singapore and the region's political and economic development as a case study.

The Southeast Asia Handbook Patrick Heenan, Monique Lamontagne, 2013-04-03

The Regional Handbooks of Economic Development series provides accessible overviews of countries within their larger domestic and international contexts, focusing on the relations among regions as they meet the challenges of the twenty-first century. The series allows the non-specialist student to explore a wide range of complex factors: social and political as well as economic, that affect the growth of developing regions in Asia, Europe and South America. Each Handbook provides an overview chapter discussing the region's economic conditions within an historical and political context, as well as 20 or more chapter-length essays written by recognized experts which analyze the key issues affecting a region's economy, its population, natural resources, foreign trade, labor problems and economic inequalities and other vital factors. In addition, the volumes offer useful support materials including a series of appendices that include a detailed chronology of events in the region, a glossary of terms, biographical entries on key personalities, an annotated bibliography of further reading and a comprehensive analytical index.

Primary School English-Language Education in Asia Bernard Spolsky, Young-in Moon, 2013-03-05

In Asia, English is no longer a foreign language but a key resource for education, government, business and the general public. Whereas thirty years ago British and American experts believed that the best way to improve the quality of English teaching was to cancel any programs below the secondary level, Asian nations as well as European are now introducing English in primary school. But there are major obstacles to overcome: the training of enough local teachers or the hiring of English speakers, the preparation of suitable teaching materials, the development of useful tests and the design of workable curriculums. The chapters in this book, written by leading English teaching professionals in seven Asian countries and originally delivered at the 2010 annual conference of Asia TEFL which took place in Hanoi, Vietnam, describe and analyze national policies and how they are implemented. The coverage is wide: China with its huge number of students learning English, Japan working to make the transition from elementary to secondary school seamless, Singapore continuing to use

English as medium of instruction for its multilingual population Korea developing English education policies to recognize the increased role of English alongside the national language India building on its colonial past to make English an economic resource Vietnam fitting English into a program of national rebuilding and Taiwan spreading its English teaching outside the national capital This is not a report of the views of outside experts but of local experiences understood by local scholars of international standing Policy makers educators researchers and scholars will be able to gain valuable insights from Asian experts

Subject Index of Modern Books Acquired British Library,1918 The Asian Modern C.J.W.-L. Wee,2007-10-01 How does one comprehend the phenomenon of the modernization of an Asian society in a globalized East Asian context With this opening question the author proceeds to give an account of how the modernization processes for postcolonial societies in Asia such as those of India Malaysia and Singapore are fraught with collaborations and conflicts between different socio political historical economic and cultural agents Such ambivalent dynamics contribute to what Wee argues as a revealing distortion of the extant models of Western modernity which is nonetheless rooted in the politics of worldwide capitalism Wee's narrative refuses to accept the uncritical interpretation of the modernizing processes in Asia as liberation from the hegemony of Euro American capitalism But neither is Wee prepared to concede that all cultural initiatives in the postcolonial societies are therefore denied all power to devise alternative forms of expression in the face of this haunting presence It is the persistent effort to see the many faces of modernization in Asia in their full complexity that sets this study apart Readers will discover that what seems to be the modernization of a single geopolitical entity is inevitably linked to the dynamics of various agents in other locations at different times which makes us reflect on the existence of the many distortions in our societies *Economic Growth and Political Change in Asia* Graham Field,2016-07-27 This book looks at the main factors which have contributed to the strikingly strong growth of Asian economies in the last twenty five years It considers the economic policies adopted to promote such growth arguing that it will become increasingly difficult to sustain this The author then examines the inequalities generated by economic growth before considering the dynamics of the four different types of political system which have evolved in Asia veiled authoritarianism market Stalinism emerging bourgeois democracy and elite democracy *Historical Dictionary of Burma (Myanmar)* Donald M. Seekins,2017-03-27 Burma Myanmar is a

Southeast Asian country that is emerging from crisis after more than a half century of hard line military rule and cultural diplomatic and economic isolation With the dissolution of its military regime the State Peace and Development Council in 2011 a formally civilian but military dominated constitutional government was inaugurated By 2012 Burma's president retired General Thein Sein had established a working relationship with Daw Aung San Suu Kyi the leader of the country's pro

democracy movement since 1988 and after a 2012 by election she and members of her opposition party the National League for Democracy NLD entered the new Union Parliament as legislators However even with the election victory of Daw Suu Kyi and the NLD in the General Election of November 2015 Burma faces daunting challenges it is still one of the poorest countries in Southeast fissured by longstanding ethnic conflicts that have made a nationwide peace agreement elusive and its people s security and the environment are threatened by foreign economic exploitation Religious discord is also widely evident as Buddhist militants instigate violence against the country s religious minorities especially Muslims Today Burma s prospects are the most hopeful they have been for over half a century as the country takes steps along the road to a more open society and economy This edition of the Historical Dictionary of Burma Myanmar encompasses not only current developments but also Burma s over 1 500 years old recorded history and the most important features of its cultures ethnicity religions society and economy This is done through achronology an introduction and an extensive bibliography The dictionary section has over 700 cross referenced entries on important personalities politics economy foreign relations religion and culture

Women, Subalterns, and Ecologies in South and Southeast Asian Women's Fiction Chitra Sankaran, 2021-11 In recent decades East Asia has gained prominence and has become synonymous with Asia while other Asian regions such as South and Southeast Asia have been subsumed under it The resultant overgeneralization has meant that significant aspects of the global ecological crisis as they affect these two regions have been overlooked Chitra Sankaran refocuses the global lens on these two rapidly developing regions of Asia Combining South Asian and Southeast Asian philosophical views and folk perspectives with mainstream ecocritical and ecofeminist theories she generates a localized critical idiom that qualifies and subverts some established theoretical assumptions This pioneering study introducing a corpus of more than thirty ecofictions by women writers from twelve countries in South and Southeast Asia examines how recent global threats to ecosystems in both nature and culture impact subdominant groups including women This new corpus reveals how women and subalterns engage with various aspects of critical ecologies Using ecofeminist theory augmented by postcolonial and risk theories as the main theoretical framework Sankaran argues that these women writers present unique perspectives that review Asian women s relationships to human and nonhuman worlds
