Handley Page Halifax:

Handley Page Halifax K. A. Merrick, 2009 The name Handley Page had been associated with the building of bomber aircraft since World War 1 thus it was no surprise that in 1936 the British Air Staff awarded the company with a development contract for another new aircraft Four out of every ten heavy bombers built in Great Britain were Halifaxes and together with the Avro Lancaster they shared the RAF's strategic night bombing offensive from 1941 through to the ultimate crescendo in 1944 Though perhaps not as shapely as the Lancaster its deeper and more spacious slab sided fuselage made it more suitable for a much wider variety of roles The type served with RAF Bomber Command on high and low level attacks over occupied Europe and Germany as well as undertaking radar counter measures It was used for Coastal Command on anti submarine and shipping attacks and also on the much overlooked but critical meteorological duties such as making the historic D Day weather analysis During the war years the Halifax flew 75 532 bombing sorties over Germany dropping over 227 610 tons of bombs In total 6 176 Halifax machines were built undergoing continuous development and improvement through the years Post war it operated on Transport and Coastal Command duties and served in Europe the Middle East and India before finally leaving RAF service in 1953 The Halifax was a much loved aircraft by the crews who flew in it as it was able to absorb considerable battle damage and still manage to bring airmen safely back home it had the highest survival rate for aircrew Within these pages Ken Merrick has written an immense study of the impressive Handley Page Halifax setting out to prove that the type for its time was a bomber second to none This detailed work is the fruit of many years of research including much new information about the development design and service of the aircraft and will be essential reading for aviation modellers and historians worldwide

Handley Page Halifax Anthony L. Stachiw, Andrew Tattersall, 2005 The Handley Page Halifax along with the Avro Lancaster and the Short Stirling was one of the three heavy bombers employed by The Royal Air Force Bomber Command in its aerial offensive against the Axis in W W II Although overshadowed by the legendary Lancaster the Halifax played a major role in the night bombing campaign in antisubmarine operations meteorological reconnaissance transport and towing gliders in airborne operations In all over 6 000 Halifax aircraft were produced and these were flown in over 75 000 missions It served from 1941 until finally retired in 1952 At one time during their service in the RAF Bomber Command all 15 RCAF Bomber Squadrons and three Heavy Conversion Units were equipped with the Halifax several operating only the Halifax Although some squadrons began reequipping with the Lancaster beginning in late 1943 the Halifax was the mainstay of these squadrons from 1942 to the end of the war in night bombing and mine laying operations This book documents the development of the Halifax aircraft from its inception during the expansion of the RAF Bomber Command in the late 1930s until production ended in 1946 Its service with RCAF 6 Group of Bomber Command and its operations with all 15 RCAF Squadrons is related with representative photographs A complete description of each version of the aircraft is presented along with accurate multi view line drawings and photographs The aircraft defensive and

offensive armament is described as well as color schemes and markings Finally a chapter is dedicated to modeling the Halifax with descriptions of kits and decal markings that have been produced This book will be a worthy addition to the collection of the historian to the modeler and for those who served in the Halifax squadrons or their families **The Handley Page Halifax Mk. I** Phil H. Listemann,2015-01-08 From before the end of the Great War the United Kingdom had coveted long range bombers that were able to bomb the continent Bomber Command formed in 1936 was a major and vital organisation within the RAF While the twin engine Vickers Wellington was about to be introduced a new generation of four engine bombers was already under development The concept was not new but in the middle of the 1930s technological progress with engines and airframe materials gave the opportunity for many air forces to develop their long range bombers It was also a matter of prestige as the long range bomber also known as the strategic bomber was not accessible to all In the middle of the 30s the USA and Germany had various projects under way and even Italy joined in When the war broke out the UK had two projects of strategic bombers on the table the Short Stirling and the Handley Page Halifax Built in small numbers less than 100 of the global production of over 6000 copies the Halifax Mk I despite its shortcomings was the first but the essential step to allow the Halifax to reach maturity goal achieved in 1943 only This study is rich of photographs appendices document and two colour profiles **The Hercules** Gordon A.  Michael Napier, 2018-02-22 A fully illustrated history of the Royal Air Force while on operations publishing to mark the
 centenary of its foundation in World War I The world's first independent air force the Royal Air Force celebrates its
 centenary in 2018 In the 100 years since the end of World War I the service has been involved in almost continuous
 operations around the globe giving the RAF the longest and most wide ranging history of any air force in the world But over
 the years this history has also become entangled with myths The Royal Air Force A Centenary of Operations sets the record
 straight dispelling these as it uncovers in both words and photographs the true exploits and accomplishments of RAF
 personnel over the last 100 years From its formation as an independent service in the dying days of World War I its desperate
 fight against the Axis air forces in World War II to its commitments during both the Cold War and modern times this is the
 complete story of how the RAF has defended Britain for a century **The Ohio State Engineer** , 1941 Canada's

 This electronic edition includes 2 black and white maps and 66 black and white photographs One of the many wartime
 airmen who documented his day to day experiences in a diary was RCAF navigator Jan Gellner Prior to the outbreak of the
 Second World War Jan was a lawyer practicing in the Czechoslovak town of Brno With the outbreak of hostilities on the
 European continent he went to Canada and trained as an air observer on the first course of the fledgling British
 Commonwealth Air Training Plan Jan Gellner began his operational tour with No 311 Czechoslovak B Squadron flying the
 venerable Vickers Wellington It did not take long for Jan's abilities to shine especially as an instructor in astro navigation For
 his farrowing role in the attack on the German cruise Prinz Eugen Jan received the coveted Distinguished Flying Cross After
 an incredible 37 operations over occupied France and Germany he became Operational Tour Expired Jan was selected for
 pilot training and went to Canada During his postwar service with the RCAF he had a distinguished career as an

administrative officer retiring in 1958 Now a civilian Jan turned to writing and became one of Canada s most knowledgeable and sought after aviation and military affairs journalist This electronic edition includes 2 black and white maps and 66 black and white photographs Fuel Fire And Fear Colin Pateman,2018-04-17 During the Second World War the need for an on board technical expert to join the Bomber Crews evolved The various systems on the latest 4 engined Heavy Bombers namely the Handley Page Halifax Shorts Stirling and Avro Lancaster witnessed the development of Flight Engineers This book provides the reader with an explanation of the origin of Flight Engineers the training of these men and the complexity of keeping large bombers in the air is an enthralling story Many gallantry medals were won by Flight Engineers including the Victoria Cross Accounts of dangerous operational flying is revealed by Flight Engineers in numerous aircraft including those of Coastal Command Direct entries into the RAF by civilians were undertaken to satisfy the demand for Flight Engineers Entrants underwent courses of varying lengths but flying training time was very sparse and remarkably it was not unknown for these men to qualify for their flying badges without ever having flown in an aircraft This book examines true accounts that took place many based upon personal flying logbooks and other unique material originating from the pilots and aircrew themselves **Bomber Command** Gordon A.
