**Sexual and Reproductive Health of Adolescents with Disabilities** Tafadzwa Rugoho, France Maphosa, 2020-12-12. This book investigates various experiences of teaching sexual and reproductive health to adolescents with disabilities. Following the adoption of the UNCRPD, adolescents with disabilities still commonly suffer from widespread violation of their rights, particularly concerning sexual and reproductive health, often being viewed as either asexual or hypersexual. Contemporary societies do not readily encourage the participation of these young people in conversations or decision-making processes concerning their own sexual and reproductive health. This book delves into such complex issues, critically examining how global communities attempt to teach sexual and reproductive issues to adolescents with disabilities in the modern era.

**Social Economy Science** Gorgi Krlev, Dominika Wruk, Giulio Pasi, Marika Bernhard, 2025-05-15. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations. Lack of progress in the area of global sustainable development and difficulties in crisis management highlight the need to transform the economy and find new ways of making society more resilient. The social economy is increasingly recognized as a driver of such transformations; it comprises traditional forms of cooperative or solidarity-based organizations alongside new phenomena such as impact investing or social tech ventures that aim to contribute to the public good. Social Economy Science provides the first comprehensive analysis of why and how social economy organizations create superior value for society. The book draws on organizational theory and transition studies to provide a systematic perspective on complex multi-stakeholder forms of action. It discusses the social economy's role in promoting innovation for impact as well as its role as an agent of societal change and as a partner to businesses, governments, and citizens.

**Reversible Suppression of Menstruation with Antiprogestins** Robert M. Brenner, 2000. The goal of this research was to utilize nonhuman primates to explore a safe, reversible method of menstrual suppression through progesterone antagonist therapy. During a normal menstrual cycle, progesterone (P) secreted in the luteal phase of the cycle primes the endometrium for menstruation. When P levels fall at the end of the cycle, menstruation ensues. Progesterone antagonists (antiprogestins, PAs) are compounds that bind to the P receptor and block P action. Continuous blockade of P action during the menstrual cycle by PAs would prevent progestational priming of the endometrium and thus inhibit menstruation. Any unopposed effects of estrogen on the endometrium would also be blocked by another effect of PAs: the endometrial antiproliferative or so-called noncompetitive antiestrogenic effect. The mechanism underlying the antiestrogenic effect of PAs was also investigated, and new insights were gained on the role of androgens in this effect. Our final report indicates that PA therapy is a reliable, reversible suppressor of menstruation; that the PA can be delivered both systemically, vaginally, and through an intrauterine device; and that

endometrial androgens may play a role in the endometrial antiproliferative effects of PAs Once clinically tested and validated in women PA therapy should provide the military woman with several new options for control of her menstrual periods
