Enacting The Presidency Political Argument Presidential Debates And Presidential Character:

Enacting the Presidency Edward A. Hinck, 1993-01-21 Presidential debates are forums designed to present and select candidates for national office. Their purpose is to provide opportunities for candidates to win over undecided voters to reinforce voters who have already made a decision about who to vote for and to change the minds of those who are willing to reconsider their initial judgments concerning which candidate seems more fit to serve as president. Edward Hinck argues that debates are not primarily about presidential policy making. Rather, they are opportunities to demonstrate a candidate's ability to lead by summarizing in a specific test of presidential character the larger conflict between the candidates. Hinck develops an in-depth rhetorical analysis of the presidential and vice presidential debates of 1960 to 1988. The analysis of each series of debates begins with an introduction that focuses discussion on the most important aspects of political image for each of the candidates, then develops a case for understanding the ways in which the debates revealed the rhetorical strengths and weaknesses of each candidate's performance. Hinck's neo-Aristotelian approach asserts that debates serve both deliberative and epideictic ends because they provide important information about the candidates that cannot be disclosed except in the dramatic confrontation of the debate and because this dramatic confrontation enacts the democratic values of rational dialogue. **Enacting The Presidency** is recommended to scholars in communication and political science.

Televised Presidential Debates in a Changing Media Environment Edward A. Hinck, 2018-11-26 This two-volume set examines recent presidential and vice presidential debates, addresses how citizens make sense of these events in new media, and considers whether the evolution of these forms of consumption is healthy for future presidential campaigns and for democracy. The presidential debates of 2016 underscored how television highlights candidates and campaigns' messages, which provide fodder for citizens' widespread use of new media to talk back to campaigns and other citizens. Social media will continue to affect the way that campaign events like presidential debates are consumed by audiences and how they shape campaign outcomes. This two-volume study is one of the first to examine the relationship between debates as televised events and events consumed by citizens through social media. It also assesses the town hall debate format from 1992 to 2016, uses the lens of civil dialogue to consider how citizens watch the debates, and considers the growing impact of new media commentary on candidate images that emerge in presidential and vice presidential debates. **Televised Presidential Debates in a Changing Media Environment** features contributions from leading political communication scholars that illuminate how presidential debates are transforming from events that are privately contemplated by citizens to events that are increasingly viewed and discussed by citizens through social media. The first volume focuses on traditional studies of debates as televised campaign events, and the second volume examines the changing audiences for debates as they become consumed and discussed by viewers outside the traditional channels of newspapers, cable news channels, and campaign messaging. Readers will contemplate questions of new forms, problems, and possibilities of political engagement that are resulting from citizens.

has been learned about televised debates and evaluating that knowledge in the context of the election process specifically and the political process generally He also examines the media and the role they occupy in presidential elections Because critics often refer to the Lincoln Douglas debates when reproaching presidential debates comparisons of the two are discussed throughout the book Much of the data and information for this accounting of televised presidential debates comes from the author s first hand experience as one who was involved with these debates as a participant observer on site at nearly all of the debates discussed Throughout these discussions emphasis is placed on the implications for public policy To suggest policy that will be accepted and adopted by politicians and the public is at best difficult Proposals for changes in public policy based on experience even when scientific data support those changes must be subjected to an assessment of the values and predispositions of the proponent These values and predispositions however may not necessarily inhibit the proponent s objectivity As such this review of television use in the presidential election process provides the context for examining televised debates
