Enchanted Loom Chapters In The History Of Neuroscience:

The Enchanted Loom Pietro Corsi,1991 **An Illustrated History of Brain Function** Edwin Clarke,Kenneth Dewhurst,Michael Jeffrey Aminoff,1996 "Misfits" in Fin-de-Siècle France and Italy Susan A. Ashley,2017-05-04 As the 19th century drew to a close France and Italy experienced an explosion of crime vagrancy insanity neurosis and sexual deviance Misfits in Fin de Si cle France and Italy examines how the raft of self appointed experts that subsequently emerged tried to explain this aberrant behavior and the many consequences this had Susan A Ashley considers why these different phenomena were understood to be interchangeable versions of the same inborn defects The book looks at why specialists in newly minted disciplines in medicine and the social sciences such as criminology neurology and sexology all claimed that biological flaws some inherited and some arising from illness or trauma made it impossible for these misfits to adapt to modern life Ashley then goes on to analyse the solutions these specialists proposed often distinguishing between born deviants who belonged in asylums or prisons and accidental misfits who deserved solidarity and social support through changes to laws relating to issues like poverty and unemployment The study draws on a comprehensive examination of contemporary texts and features the work of leading authorities like Cesare Lombroso Jean Martin Charcot and Th odule Ribot as well as investigators less known now but influential at the time The comparative aspect also interestingly shows that experts collaborated closely across national and disciplinary borders employed similar methods and arrived at common conclusions This is a valuable study for all social and cultural historians of France and Italy and anyone interested in knowing more about the history of medicine in modern Europe **Nervous System Actions and Interactions** L. Donald Partridge,Lloyd D. Partridge,2012-12-06 Nervous System Actions and Interactions Concepts in Neurophysiology approaches the nervous system from a functional rather than structural point of view While all of the central topics of functional neuroscience are covered these topics are organized from a neurophysiological perspective yielding chapters on subjects such as information storage and effector actions Each chapter is organized around general concepts that then are further developed in the text The authors attempt to establish a dialogue with the reader by means of proposed experiments and open ended questions that are designed to both reinforce and question the text This volume is intended to be a book of ideas for the novice or seasoned researcher in neuroscience **Deus in Machina** Jeremy Stolow,2012-11-05 The essays in this volume explore how two domains of human experience and action religion and technology are implicated in each other Contrary to commonsense understandings of both religion as an otherworldly orientation and technology as the name for tools techniques and expert knowledges oriented to this world the contributors to this volume challenge the grounds on which this division has been erected in the first place What sorts of things come to light when one allows religion and technology to mingle freely In an effort to answer that question Deus in Machina embarks upon an interdisciplinary voyage across diverse traditions and contexts where religion and technology meet from the design of clocks in medieval Christian

Europe to the healing power of prayer in premodern Buddhist Japan to 19th century Spiritualist devices for communicating with the dead to Islamic debates about kidney dialysis in contemporary Egypt to the work of disability activists using documentary film to reimagine Jewish kinship to the representation of Haitian Vodou on the Internet among other case studies Combining rich historical and ethnographic detail with extended theoretical reflection *Deus in Machina* outlines new directions for the study of religion and as technology that will resonate across the human sciences including religious studies science and technology studies communication studies history anthropology and philosophy

Law, Mind and Brain

Michael Freeman, Oliver R. Goodenough, 2017-05-15 Over the past 20 years cognitive neuroscience has revolutionized our ability to understand the nature of human thought Working with the understandings of traditional psychology the new brain science is transforming many disciplines from economics to literary theory These developments are now affecting the law and there is an upsurge of interest in the potential of neuroscience to contribute to our understanding of criminal and civil law and our system of justice in general The international and interdisciplinary chapters in this volume are written by experts in criminal behaviour civil law and jurisprudence They concentrate on the potential of neuroscience to increase our understanding of blame and responsibility in such areas as juveniles and the death penalty evidence and procedure neurological enhancement and treatment property end of life choices contracting and the effects of words and pictures in law This collection suggests that legal scholarship and practice will be increasingly enriched by an interdisciplinary study of law mind and brain and is a valuable addition to the emerging field of neurolaw

Dynamic Matter Jennifer Linhart

Wood, 2022-05-03 *Dynamic Matter* investigates the life histories of Renaissance objects Eschewing the critical tendency to study how objects relate to human needs and desires this work foregrounds the objects themselves demonstrating their potential to transform their environments as they travel across time and space Integrating early modern material theories with recent critical approaches in Actor Network Theory and object oriented ontology this volume extends Aristotle's theory of *dynamis* which conceptualizes matter as potentiality and applies it to objects featured in early modern texts such as Edmund Spenser's *The Faerie Queene* Robert Hooke's *Micrographia* and William Shakespeare's *The Tempest* Individual chapters explore the *dynamis* of matter by examining its manifestations in particular forms combs are inscribed with words and brushed through human hair feathers are incorporated into garments and artwork Prince Rupert's glasswork drops explode a whale becomes animated by the power of a magical bracelet and books are drowned These case studies highlight the potentiality matter itself possesses and that which it activates in other matter A theorization of objects grounded in Renaissance materialist thought *Dynamic Matter* examines the richness of things themselves the larger multiple and changing networks in which things circulate and the networks created by these transformative objects In addition to the editor the contributors to this volume include Anna Riehl Bertolet Erika Mary Boeckeler Naomi Howell Emily E F Philbrick Josie Schoel Maria Shmygol Edward McLean Test Abbie Weinberg and Sarah F Williams

Memory's Ghost Philip J. Hilts, 1996-08-02 In an experiment that occurred some forty years ago Henry M s memory was stolen from him during a highly controversial operation performed to cure his epilepsy Henry has lived in the immediate present ever since unable to connect a past moment with the next incapable of retaining or recalling any physical or emotional experience Philip J Hilts one of the few people to spend time with Henry who is sequestered in a hospital draws on Henry s bizarre situation as well as current cutting edge research into the functions of the brain in a revealing investigation of How an individual s memory is constructed When and why memory fails The efficacy of mnemonic devices The validity of recovered memories Part poetic reflection and philosophical meditation part popular science and investigative journalism Memory s Ghost is an unforgettable journey into the mysteries of the human mind

The Discovery of the Artificial R. Cordeschi, 2013-04-17 This series will include monographs and collections of studies devoted to the investigation and exploration of knowledge information and data processing systems of all kinds no matter whether human other animal or machine Its scope is intended to span the full range of interests from classical problems in the philosophy of mind and philosophical psychology through issues in cognitive psychology and sociobiology concerning the mental capabilities of other species to ideas related to artificial intelligence and to computer science While

primary emphasis will be placed upon theoretical conceptual and epistemological aspects of these problems and domains empirical experimental and methodological studies will also appear from time to time The present volume offers a broad and imaginative approach to the study of the mind which emphasizes several themes namely the importance of functional organization apart from the specific material by means of which it may be implemented the use of modeling to simulate these functional processes and subject them to certain kinds of tests the use of mentalistic language to describe and predict the behavior of artifacts and the subsumption of processes of adaptation learning and intelligence by means of explanatory principles The author has produced a rich and complex lucid and readable discussion that clarifies and illuminates many of the most difficult problems arising within this difficult domain

The Art of Recollection in Jena Romanticism

Laurie Ruth Johnson, 2015-02-06 This exploration of Romantic depictions of memory as a faculty of body as well as of mind analyzes representations of remembrance in Jena Romantic texts When these texts pose questions about memory's employment and depiction in art about the aestheticization of recollection they reveal serious doubt about the explanatory ability of the philosophical psychological and aesthetic discourses against which Romantic and modern thought is constructed

Renaissance Futurities Charlene Villaseñor Black, Mari-Tere Álvarez, 2019-11-05 At publication date a free ebook version of this title will be available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more *Renaissance Futurities* considers the intersections between artistic rebirth the new science and European imperialism in the global early modern world Charlene Villaseñor Black and Mari-Tere Álvarez take as inspiration the work of Renaissance genius Leonardo da Vinci 1452-1519 prolific artist and inventor and other polymaths such as philosopher Giulio Delminio Camillo 1480-1544 physician and naturalist Francisco Hernández de Toledo 1514-1587 and writer Miguel de Cervantes 1547-1616 This concern with futurity is inspired by the Renaissance itself a period defined by visions of the future as well as by recent theorizing of temporality in Renaissance and Queer Studies This transdisciplinary volume is at the cutting edge of the humanities medical humanities scientific discovery and avant-garde artistic expression

Marcel Duchamp and the Architecture of Desire Penelope Haralambidou, 2017-03-02 While much has been written on Marcel Duchamp one of the twentieth century's most beguiling artists the subject of his flirtation with architecture seems to have been largely overlooked Yet in the carefully arranged plans and sections organising the blueprint of desire in the Large Glass his numerous pieces replicating architectural fragments and his involvement in designing exhibitions Duchamp's fascination with architectural design is clearly evident As his unconventional architectural influences Nicéron Lequeu and Kiesler and diverse legacy Tschumi OMA Webb Diller Scofidio and Nicholson indicate Duchamp was not as much interested in built architecture as he was in the architecture of desire re-constructing the imagination through drawing and testing the boundaries between reality and its aesthetic and philosophical possibilities *Marcel Duchamp and the Architecture of Desire* examines the link between architectural thinking and Duchamp's work By employing design drawing and making the tools of

the architect Haralambidou performs an architectural analysis of Duchamp's final enigmatic work *Given 1 The Waterfall 2 The Illuminating Gas* demonstrating an innovative research methodology able to grasp meaning beyond textual analysis This novel reading of his ideas and methods adds to but also challenges other art historical interpretations Through three main themes allegory, visuality and desire the book defines and theorises an alternative drawing practice positioned between art and architecture that predates and includes Duchamp

David Hartley on Human Nature Richard C. Allen, 1999-06-24 In this first complete account of Hartley's thought Richard Allen explains Hartley's theories of physiology, perception and action, language and cognition, emotional development and transformation and spiritual transcendence By drawing a biographical portrait of its subject the book explores the relationship of mind and body in Hartley's system and surveys Hartley's influence upon later scientists and social reformers particularly Joseph Priestley

From Clouds to the Brain Celine Cherici, 2020-12-03 Based on research on the links between deep brain stimulation and its applications in the field of psychiatry the history of techniques is of great importance in this book in order to understand the scope of the fields of application of electricity in brain sciences The concepts of brain electricity stimulation measurement and therapy are further developed to identify lines of convergence, ruptures and conceptual perspectives for a materialistic understanding of human nature that emerged during the 18th century In an epistemological posture at the crossroads of the concepts of epistemes as stated by Foucault and phenomenotechnics as conceived by Bachelard the analyses focus on the technical content of the theories while inscribing them in the language and specificities of each era

Quixotic Memories Julia Dominguez, 2022-03-01 The work of Miguel de Cervantes one of the most influential writers in early modern Europe is a reflection of the rich culture of memory in which it was created More than a theme memory is a system of understanding in Cervantes's world resulting from the major social, religious and economic changes that epitomized Renaissance humanist culture and that informed the transition to modernity *Quixotic Memories* offers insight into the plurality and complexity of memory and demonstrates how it plays an exceptionally critical role in Cervantes's *Don Quixote* It acknowledges Cervantes's transition into modernity as he engaged with theories of memory that were developed in classical antiquity and adapted to the specific circumstances of his own time Julia Dominguez explores the many spaces that memory created for itself in early modern Spain particularly in the fields of philosophy, medicine, rhetoric, mnemotechnics, the visual arts and pedagogy Engaging with primary and archival sources *Quixotic Memories* provides a new reading of Cervantes's famous novel by tracing the socio-historical and cultural prominence of memory throughout the author's lifetime

Brain and Race Claudio Pogliano, 2020-06-02 Since the second half of the eighteenth century generations of scientists persisted in studying the relationships between the volume, weight or shape of the human brain and the degree of intelligence In Pogliano's book the thread of time drives the narrative up to the mid twentieth century It investigates the duration and changes of a game that was intrinsically political although having to do with bones and nervous matter Races made its main object during a long

period when Western culture believed the human species to be naturally partitioned into a number of discrete types with their innate and hereditary traits Never leading to irrefutable achievements the polycentric as well as visual enterprise herein described is full of growing tensions doubts and disillusionment **Beyond Boundaries** Linda Phyllis

Austern, Candace Bailey, Amanda Eubanks Winkler, 2017-02-13 English music studies often apply rigid classifications to musical materials their uses their consumers and performers The contributors to this volume argue that some performers and manuscripts from the early modern era defy conventional categorization as amateur or professional native or foreign These leading scholars explore the circulation of music and performers in early modern England reconsidering previously held ideas about the boundaries between locations of musical performance and practice
