Enchanted Rendezvous James R. Hansen, 1995 *Enchanted Rendezvous* National Aeronautics Administration, James Hansen, 2013-11 One of the most critical technical decisions made during the conduct of Project Apollo was the method of flying to the Moon landing on the surface and returning to Earth Within NASA during this debate several modes emerged The one eventually chosen was lunar orbit rendezvous LOR a proposal to send the entire lunar spacecraft up in one launch It would head to the Moon enter into orbit and dispatch a small lander to the lunar surface It was the simplest of the various methods both in terms of development and operational costs but it was risky Since rendezvous would take place in lunar instead of Earth orbit there was no room for error or the crew could not get home Moreover some of the trickiest course corrections and maneuvers had to be done after the spacecraft had been committed to a circumlunar flight Between the time of NASA's conceptualization of the lunar landing program and the decision in favor of LOR in 1962 a debate raged between advocates of the various methods John C Houbolt an engineer at the Langley Research Center in Hampton Virginia was one of the most vocal of those supporting LOR and his campaign in 1961 and 1962 helped to shape in a fundamental way the deliberations This monograph is an important contribution to the study of NASA history in general and the process of accomplishing a large scale technological program in this case Apollo in particular In many ways the lunar mode decision was an example of heterogeneous engineering a process that recognizes that technological issues are also simultaneously organizational economic social and political Various interests often clash in the decision making process as difficult calculations have to be made and decisions taken What perhaps should be suggested is that a complex web or system of ties between various people institutions and interests brought forward the lunar orbit rendezvous mode of going to the Moon in the 1960s *Enchanted Rendezvous* Rebecca Ward, 1991-08-01 Cecily Vervain is determined to discover whether her aunt's seemingly foppish houseguest Lord Brandon is a criminal smuggler knave traitor or hero *Enchanted Rendezvous* , 2011

Enchanted Rendezvous National Aeronautics and Space Administration (NASA), 2018-07-06 This is the fourth publication of the Monographs in Aerospace History series prepared by the NASA History Office These publications are intended to be tightly focused in terms of subject relatively short in length and reproduced to allow timely and broad dissemination to researchers in aerospace history This publication details the arguments of John C Houbolt an engineer at the Langley Research Center in Hampton Virginia in his 1961-1962 campaign to support the lunar orbit rendezvous LOR The LOR was eventually selected during Project Apollo as the method of flying to the Moon landing on the surface and returning to Earth The LOR opted to send the entire lunar spacecraft up in one launch enter into the lunar orbit and dispatch a small lander to the lunar surface It was the simplest of the various methods both in terms of development and operational costs but it was risky There was no room for error or the crew could not get home and the more difficult maneuvers had to be done when the spacecraft was committed to a circumlunar flight Houbolt was one of the most vocal people supporting the LOR Hansen

One Giant Leap Charles Fishman, 2020-09-22 The New York Times bestselling meticulously researched and absorbingly written The Washington Post story of the trailblazers and the ordinary Americans on the front lines of the epic Apollo 11 moon mission President John F Kennedy astonished the world on May 25 1961 when he announced to Congress that the United States should land a man on the Moon by 1970 No group was more surprised than the scientists and engineers at NASA who suddenly had less than a decade to invent space travel When Kennedy announced that goal no one knew how to navigate to the Moon No one knew how to build a rocket big enough to reach the Moon or how to build a computer small enough and powerful enough to fly a spaceship there No one knew what the surface of the Moon was like or what astronauts could eat as they flew there On the day of Kennedy's historic speech America had a total of fifteen minutes of spaceflight experience with just five of those minutes outside the atmosphere Russian dogs had more time

in space than US astronauts Over the next decade more than 400 000 scientists engineers and factory workers would send twenty four astronauts to the Moon Each hour of space flight would require one million hours of work back on Earth to get America to the Moon on July 20 1969 A veteran space reporter with a vibrant touch nearly every sentence has a fact an insight a colorful quote or part of a piquant anecdote The Wall Street Journal and in One Giant Leap Fishman has written the sweeping definitive behind the scenes account of the furious race to complete one of mankind s greatest achievements It s a story filled with surprises from the item the astronauts almost forgot to take with them the American flag to the extraordinary impact Apollo would have back on Earth and on the way we live today From the research labs of MIT where the eccentric and legendary pioneer Charles Draper created the tools to fly the Apollo spaceships to the factories where dozens of women sewed spacesuits parachutes and even computer hardware by hand Fishman captures the exceptional feats of these ordinary Americans It s been 50 years since Neil Armstrong took that one small step Fishman explains in dazzling form just how unbelievable it actually was Newsweek **Spaceflight Revolution** James R. Hansen,1995 *Fairing Well* Christian Gelzer,2011 **Science in Flux** Mark D. Bowles,2006 *Wilbur and Orville Wright* Arthur George Renstrom,2003 During the year 2003 hundreds of events will mark the one hundredth anniversary of the Wright brothers historic first flights at Kitty Hawk North Carolina The centennial year will witness exhibitions lectures television documentaries films air shows flight recreations of Wright aircraft the issuing of postage stamps and medals the publication of dozens of new books and articles and numerous other commemorative activities One of these events although not likely to make the evening news is among the most important of all in terms of a lasting contribution to the observance of this ultimate aviation milestone the reprinting of Arthur G Renstrom s *Wilbur Orville Wright A Chronology Commemorating the Hundredth Anniversary of the Birth of Orville Wright August 19 1871* Since its appearance in 1975 *Wilbur Orville Wright A Chronology* has become indispensable to students and authors concerned with the life and work of the famous brothers No doubt every book on the subject published in the last quarter century including three of my own was written with this treasure close at hand This volume is far more than a simple compilation of dates and facts Renstrom was a master reference librarian and bibliographer with a passion for aviation and the Wright brothers He brought his considerable research skills to bear on the topic and the result is a richly detailed ever informative often entertaining walk through the lives and achievements of these two extraordinary individuals Renstrom was not content to offer a date with a one line tidbit His entries are brimming with information This is a highly readable reference work that believe or not can be enjoyably read from cover to cover The project was clearly a labor of love by a talented professional During most of the last twenty years I have been privileged to be the curator of the 1903 Wright Flyer at the Smithsonian Institution s National Air and Space Museum The position brings a steady stream of inquiries about the Wright airplane and the endlessly fascinating brothers who created it I do not know how I would have done this job without Renstrom s superb volume on my bookshelf It is the first

place I go to check anything on the Wright brothers and I typically find what I am looking for in its pages Arthur Renstrom also published two other classic reference works on the Wright brothers Wilbur Orville Wright A Bibliography Commemorating the Hundredth Anniversary of the Birth of Wilbur Wright April 16 1867 in 1968 an updated revision was published by the National Aeronautics and Space Administration in 2002 and Wilbur Orville Wright Pictorial Materials A Documentary Guide in 1982 completing a series of research tools for which there are few peers on any subject He was also part of the team that produced the landmark two volume compilation of the Wrights letters notebooks and diaries in 1953 The Papers of Wilbur and Orville Wright edited by Marvin W McFarland Renstrom s contribution to the documentation and preservation of the Wright story is a lasting legacy that will serve researchers students and general enthusiasts for generations to come In this busy high profile anniversary year the reprinting of a nearly thirty year old reference book may seem a mundane and quiet contribution to the celebration surrounding the Wright brothers world changing achievement but it is perhaps one of the most important The U S Centennial of Flight Commission and NASA are to be commended for their foresight 100 Days Harlan Lebo,2019-06-28 Some events that transform a nation are frozen in time Others pass with little public awareness and we only appreciate their momentous nature long after they occur Regardless these events are few and almost always far between But in 1969 four such events took place within the span of only 100 days In this book cultural historian Harlan Lebo looks back at the first moon landing the Manson family murders Woodstock and the birth of the Internet to tell the story of how each event shaped the nation and how we perceive ourselves Loaded with captivating anecdotes and insights based on extensive interviews with eyewitnesses and participants to provide historical insight and contemporary context 100 Days will fascinate readers who seek a deeper appreciation of how four seemingly unrelated events shaped America s emergence as the nation we have become **NASA Historical Data Book: NASA launch systems, space transportation** ,1988 *NASA's First* A Robert G. Ferguson,2013 **NASA and the environment the case of ozone depletion** W. Henry Lambright,2005 **Societal Impact of Spaceflight** Steven J. Dick,Roger D. Launius,2007 Since the dawn of spaceflight advocates of a robust space effort have argued that human activity beyond Earth makes a significant difference in everyday life Assertions abound about the impact of spaceflight on society and its relationship to the larger contours of human existence Fifty years after the Space Age began it is time to examine the effects of spaceflight on society in a historically rigorous way Has the Space Age indeed had a significant effect on society If so what are those influences What do we mean by an impact on society And what parts of society Conversely has society had any effect on spaceflight What would be different had there been no Space Age The purpose of this volume is to examine these and related questions through scholarly research making use especially of the tools of the historian and the broader social sciences and humanities Herein a stellar array of scholars does just that and arrives at sometimes surprising conclusions *Handbook on Innovation and Project Management* Andrew Davies,Sylvain Lenfle,Christoph H. Loch,Christophe

Midler,2023-10-06 Identifying the origins and evolution of innovation and project management this unique Handbook explains why and how the two fields have grown and developed as separate disciplines highlighting how and why they are now converging It explores the theoretical and practical connections between the management of innovations and projects examining the close relationship between the disciplines **NASA Historical Data Book, V. 7** ,1976 This volume of the NASA Historical Data Book is the seventh in the series that describes NASA s programs and projects Covering the years 1989 through 1998 it includes the areas of launch systems human spaceflight and space science continuing the volumes that addressed these topics during NASA s previous decades Each chapter presents information much of it statistical addressing funding management and details of programs and missions Cosmos & Culture: Cultural Evolution in a Cosmic Context Steven J.
