Phenomenology, Uncertainty, and Care in the Therapeutic Encounter Mark Leffert, 2015-08-11 Phenomenology Uncertainty and Care in the Therapeutic Encounter is the latest in a series of books where Mark Leffert explores the therapeutic encounter as both process and situation looking for evidence of therapeutic effectiveness rather than accepting existing psychoanalytic concepts of theory or cure without question Mark Leffert focuses on the uncomfortable fact that analysts and therapists can and do make many mistaken assumptions and false moves within their clinical practice and that there is a tendency to ignore the significant levels of uncertainty in what they do Beginning with a discussion of the phenomenology of the self and its relations with the world the book moves on to explore the notion that interdisciplinary discourse both opens up possibilities in the therapeutic encounter but also imposes healthy constraints on what can be thought or theorized about psychoanalytically Phenomenology Uncertainty and Care in the Therapeutic Encounter contributes a new understanding of familiar material and brings a new focus to the care giving and healing aspects of psychoanalysis and psychotherapy leading to a shift in the analyst's identity from that of one who analyses to one who cares for and heals This book will be of interest to Psychoanalysts and psychotherapists neuroscientists and academics in the fields of psychiatry comparative literature and literature and the mind

individual client's development showing how a carefully structured stage based series of therapeutic relationships can be rewarding for both client and therapist Illustrated throughout by case examples this is a book for practitioners of all psychological therapies who are looking for a rigorous but flexible approach to empowering their clients

Suffering and Sacrifice in the Clinical Encounter Charles Ashbach, Karen Fraley, Paul Koehler, James L. Poulton, 2020-06-01 In *Suffering and Sacrifice in the Clinical Encounter* the authors identify the ways in which some patients seek to create what Freud termed a private religion and unconsciously substitute sacrificial enactments of scapegoat surrogates to protect them against the pain of separation mourning and loss of primary figures of attachment They investigate the function of sacrifice and its relationship to the breakdown of psychic structure and the development of manic defenses and pathological narcissism Such treatments are complex the reversed roles of victim and perpetrator central to the sacrificial process when enacted in therapy can trigger feelings of shame guilt and inadequacy in the therapist Perverse vengeful and sadistic transference distortions are explored to enable the therapist to appreciate the true nature of the patient's hidden traumatic experience with the necessity for the working through of genuine separation and grieving highlighted Useful methods are detailed to counter the tendency to become overly active and inappropriately involved when working with patients who have deadened their desire to improve This book is unique in utilising the dynamic concepts of the effects of trauma and sacrifice the role of the scapegoat and the distinctions between the experience of pain and the accomplishment of suffering in order to develop a foundational understanding of such patients It is a must read for all practising and trainee therapists
