date treatment than Taylor and Francis's 1994 *Encyclopedia of Time*. Highly recommended Library Journal STARRED Review. Surveying the major facts, concepts, theories, and speculations that infuse our present comprehension of time, the *Encyclopedia of Time: Science, Philosophy, Theology, Culture* explores the contributions of scientists, philosophers, theologians, and creative artists from ancient times to the present. By drawing together into one collection ideas from scholars around the globe and in a wide range of disciplines, this *Encyclopedia* will provide readers with a greater understanding of and appreciation for the elusive phenomenon experienced as time. Features surveys of historical thought about time, including those ideas that emerged in ancient Greece, early Christianity, the Italian Renaissance, the Age of Enlightenment, and other periods. Covers the original and lasting insights of evolutionary biologist Charles Darwin, physicist Albert Einstein, philosopher Alfred North Whitehead, and theologian Pierre Teilhard de Chardin. Discusses the significance of time in the writings of Isaac Asimov, Samuel Taylor Coleridge, Fyodor M. Dostoevsky, Francesco Petrarca, H. G. Wells, and numerous other authors. Contains the contributions of naturalists and religionists, including astronomers, cosmologists, physicists, chemists, geologists, paleontologists, anthropologists, psychologists, philosophers, and theologians. Includes artists' portrayals of the fluidity of time, including painter Salvador Dalí's *The Persistence of Memory* and *The Discovery of America* by Christopher Columbus, and writers Gustave Flaubert's *The Temptation of Saint Anthony* and Henryk Sienkiewicz's *Quo Vadis*. Provides a truly interdisciplinary approach with discussions of Aztec, Buddhist, Christian, Egyptian, Ethiopian, Hindu, Islamic, Navajo, and many other cultures' conceptions of time. Key Themes: Biography, Biology, Evolution, Culture, History, Geology, Paleontology, Philosophy, Physics, Chemistry, Psychology, Literature, Religion, Theology, Theories, Concepts. [The Popular Encyclopedia of World Religions](#) Richard Wolff, 2007. A concise guide covers the history, beliefs, and practices, key leaders, and impact upon the modern world of major world religions, including Islam, Buddhism, Confucianism, and Daoism, Hinduism, Judaism, and Christianity. **The Encyclopaedia Britannica**, 1911. *Textures of the Sikh Past* Tony Ballantyne, 2007. Focusing on new directions in Sikh and Punjab studies, this volume offers fresh perspectives on Sikh culture and history. Discussing contemporary developments affecting Sikhs around the world, it provides a contextualized study of how modern Sikhism has evolved, with particular attention to historical documents, changes in the colonial period, and the varied yet intertwined experiences of Sikhs in the diaspora. This valuable collection addresses a wide variety of themes, including Sikh textual tradition and popular culture, operation of social hierarchies, local histories, transformation of Punjab under British rule, and other social issues that concern the Panth as a whole. The essays are united by a deep concern with the texture of Sikh history, the ways in which space, time, social structures, and political systems have shaped the development of the Panth. They also investigate the forces, processes, and structures that have conditioned Sikh history. In bringing together this range of carefully researched perspectives, this book not only offers a compelling manifestation of the complex fabric of Sikh history but also identifies new approaches that will provide vantage points for further research. With contributions from prominent

scholars this book will interest students and scholars of Sikh studies religious and cultural studies diaspora studies South Asia studies sociology and politics as well as the informed lay reader
