**Twenty-Second Symposium on Biotechnology for Fuels and Chemicals** Brian H. Davison, James D. McMillan, Mark Finkelstein, 2012-12-06. Lysts using enzyme, microbial and plant biochemistries and genetic engineering and Processing Research described the conversion of plant components via integration of microbiology, biochemistry and chemistry with engineering separations and hybrid systems. The Enzymatic Processes and Enzyme Production session focused on the manufacture and use of enzymes. The Industrial Chemicals session emphasized recent developments in the integrated production and scale up of chemicals from biological rather than petrochemical routes. Special interest was on separation methods and their integration into new fermentation or hybrid processes. 35 oral presentations, a roundtable. The technical program consisted of forum, two special topic discussions and a poster session of 135 posters. We continued a successful informal roundtable series with Bioenergy and Bioproducts Forum on Recent Government Initiatives which discussed the President's Executive Order, the Bioenergy Initiative, the Technology Roadmap for Renewables Vision 2020 and other thrusts. These events continue the strong industrial focus and active industrial participation in the organizing committee. This has become very popular because it allows industrial and government participants to speak more openly. A special Topics Discussion Group was held on CO<sub>2</sub> Sequestration 2 led by James W. Lee. Another one was held on Commercialization of Bio-mass to Ethanol where chairs Jack N. Saddler and David J. Gregg made the goal of this workshop to show participants that we are close to demonstrating the technical viability of an integrated biomass to ethanol process and that progressive technical advances and policy decisions will likely greatly enhance the economic attractiveness of the process.
