Encyclopedia of Genetics: Aggression - heredity and environment Jeffrey A. Knight, Robert McClenaghan, 1999

Breakthrough discoveries in the field of genetics have increased the general public's interest in the area. The Encyclopedia of Genetics was created to meet the demands of such users. The 172 articles range from 1,000 to 3,500 words and include key features such as a list of the defined words and a significance section that summarizes the article. The contributors give clear explanations of complex theories and methods aimed at the general reader. This is a unique resource to answer genetic questions from the non-scientific community. Outstanding reference sources. 2000 American Libraries May 2000 Comp by the Reference Sources Committee RUSA ALA

Genetic Engineering Mark Y. Herring, 2005-12-30 Genetic engineering has quickly become one of the more controversial issues of our time. Herring provides a detailed history of the debate in a fair and balanced manner using proponents' points of view to make individual cases both pro and con. Narrative chapters cover such topics as the Human Genome Project, gene splicing, cloning, genetically altered foods, and DNA and crime solving. Students and the general public will find a comprehensive survey of the genetic engineering debate. Appendices include statements from Robert P. George and Peter Singer, two of the most prominent scholars on the subject, and a bibliography of print and electronic resources for further research.

The SAGE Encyclopedia of Criminal Psychology Robert D. Morgan, 2019-04-25 The SAGE Encyclopedia of Criminal Psychology will be a modern interdisciplinary resource aimed at students and professionals interested in the intersection of psychology, e.g., social, forensic, clinical, criminal justice, sociology, and criminology. The interdisciplinary study of human behavior in legal contexts includes numerous topics on criminal behavior, criminal justice policies, and legal process, crime detection and prevention, eyewitness identification, prison life, offender assessment and rehabilitation, risk assessment and management, offender mental health, community reintegration, and juvenile offending. The study of these topics has been increasing continually since the late 1800s with people trained in many legal professions such as policing, social work, law, academia, mental health, and corrections. This will be a comprehensive work that will provide the most current empirical information on those topics of greatest concern to students who desire to work in these fields. This encyclopedia is a unique reference work that looks at criminal behavior primarily through a scientific lens. With over 500 entries, the book brings together top empirically driven researchers and clinicians across multiple fields: psychology, criminology, social work, and sociology to explore the field.
