Jackson Knight,2011-06-10 The formation of the Confederate States of America involved more than an attempt to create a new sovereign nation it inspired a flurry of creativity and entrepreneurialism in the South that fiercely matched Union ingenuity H Jackson Knight's Confederate Invention brings to

light the forgotten history of the Confederacy's industrious inventors and its active patent office. Despite the destruction wrought by the Civil War, evidence of Confederate inventions exists in the registry of the Confederate States Patent Office. Hundreds of southerners submitted applications to the agency to secure patents on their intellectual property which ranged from a machine for operating submarine batteries to a steam plough to a combined knapsack and tent to an instrument for sighting cannon. The Confederacy's most successful inventors included entrepreneurs, educators, and military men who sought to develop new weapons, weapon improvements, or other inventions that could benefit the Confederate cause as well as their own lives. Each creation belied the conception of a technologically backward South incapable of matching the creativity and output of northern counterparts. Knight's work provides a groundbreaking study that includes neglected and largely forgotten patents as well as an array of other primary sources. Details on the patent office's origins, inner workings, and demise, and accounts of southern inventors who obtained patents before, during, and after the war, reveal a captivating history recovered from obscurity. A novel creation in its own right, *Confederate Invention* presents the remarkable story behind the South's long forgotten Civil War inventors and offers a comprehensive account of Confederate patents. [America, History and Life](#), 1996. Article abstracts and citations of reviews and dissertations covering the United States and Canada. [Encyclopedia Britannica](#), 1970. [Confederate Conscription and the Struggle for Southern Soldiers](#). John M. Sacher, 2021-12-08. Winner of the Jules and Frances Landry Award, Finalist for the 2022 Gilder Lehrman Lincoln Prize. In April 1862, the Confederacy faced a dire military situation. Its forces were badly outnumbered; the Union army was threatening on all sides, and the twelve-month enlistment period for original volunteers would soon expire. In response to these circumstances, the Confederate Congress passed the first national conscription law in United States history. This initiative touched off a struggle for healthy white male bodies both for the army and on the home front, where they oversaw enslaved laborers and helped produce food and supplies for the front lines that lasted till the end of the war. John M. Sacher's history of Confederate conscription serves as the first comprehensive examination of the topic in nearly one hundred years, providing fresh insights into and drawing new conclusions about the southern draft program. Often summarily dismissed as a detested policy that violated states' rights and forced nonslaveholders to fight for planters, the conscription law elicited strong responses from southerners wanting to devise the best way to guarantee what they perceived as shared sacrifice. Most who bristled at the compulsory draft did so believing it did not align with their vision of the Confederacy. As Sacher reveals, white southerners' desire to protect their families, support their communities, and ensure the continuation of slavery shaped their reaction to conscription. For three years, Confederates tried to achieve victory on the battlefield while simultaneously promoting their vision of individual liberty for whites and states' rights. While they failed in that quest, Sacher demonstrates that southerners' response to the 1862 conscription law did not determine their commitment to the Confederate cause. Instead, the implementation of the draft spurred a debate about sacrifice, both physical and ideological, as the Confederacy's insatiable demand for soldiers only grew.
