The Pope Encyclopedia Matthew Bunson,1999-06-01 Politics and the Papacy in the Modern World Frank J. Coppa,2008-06-30 The outbreak of the French Revolution and the Industrial Revolution at the turn of the nineteenth century transformed the world and ushered in the modern age whose currents challenged the traditional political order and the prevailing religious establishment The new secular framework presented a potential threat to the papal leadership of the Catholic community which was profoundly affected by the rush towards modernization In the nineteenth century the transnational church confronted a world order dominated by the national state until the emergence of globalization towards the close of the twentieth century Here Coppa focuses on Rome s response to the modern world exploring the papacy s political and diplomatic role during the past two centuries He examines the Vatican s impact upon major ideological developments over the years including capitalism nationalism socialism communism modernism racism and anti Semitism At the same time he traces the continuity and change in the papacy s attitude towards church state relations and the relationship between religion and science Unlike many earlier studies of the papacy which examine this unique institution as a self contained unit and concentrate upon its role within the church this study examines this key religious institution within the broader framework of national and international political diplomatic social and economic events Among other things it explores such questions as the limits to be placed on national sovereignty the Vatican s critique of capitalism and communism
