opinion has affected contemporary politics and the democratic process Herbst asks difficult but fundamental questions about the workings of American politics An original and thought provoking analysis of why we have polls what they accomplish and how they affect the current political scene Herbst s scholarship is impeccable her writing is clear and crisp and her findings are original Every reader will benefit by carefully weighing the issues she raises and the conclusions she draws Doris A Graber Political Science Quarterly An intelligent theoretically rich and historically broad account of public opinion over several millennia The historical accounts are interesting and her interpretations are thought provoking Paul Brace Journal of American History

**What It Means to Be Human (Colour Edition)** Taro Maeyashiki, 2025-09-21 This book What It Means to Be Human Moral and Existential Questions in British and American Literature is a selective anthology of academic articles exploring the wide and complex field of American and British literature from the 17th to the 21st century their moral psychological philosophical and sociological implications and closer deeper reading of a rich variety of texts All chapters engage the reader in a conversation with particular works that throw light on both their own time and place and the issues that are always woven through the fabric of human life The spiritual despair of Melville s Captain Ahab the moral uncertainty of Twain s Huck Finn the metaphysical skepticism of The Mysterious Stranger the audacity of Charlotte Bront s proclamation of female empowerment Ian McEwan s painful reflection on guilt and the impossibility of redemption these essays speak to the contradictions discomfort and desire both in individuals and in the broader community that literature reveals and engages with Even more it is the study of connections the collection makes between time and genre Thus it is easy to see how Melville s metaphysical preoccupations were countered by Thoreau s gentle yearning for simplicity Salinger s alienation of youth could be read against Hawthorne s tragic dark allegories of faith and disenchantment The psychological disintegration of The Yellow Wallpaper and the absurdity of existence in The Sun Also Rises are cited in the stories of spiritual revolt and social criticism The Fool s ironic insight in Shakespeare s King Lear serves as a connotative precursor for the post modernist fragmentation of the quest for truth as it emerges in the self exploring wanderings of Holden Caulfield The common thread that links this wide ranging exploration of literary questions is the sense that at its best literature does not just mirror reality it ruptures relations displaces certainties and wrestles us from complacency in our understanding of justice love freedom and the precarious scaffolding of the self These fictions never yield clear answers or definitive truths rather they leave us in a state of discomfort and uncertainty amid contradiction and moral ambiguity Moreover most importantly they beckon us always to hear the thoughts of those seated at the intersection of art and ethics I hope this volume will be a space for continued thought and dialogue and a source of inspiration for the readers to return to the literary works to interrogate resist remember and humanize

Newsworkers Hanno Hardt, Bonnie Brennen, 1995 Focusing on the period from the 1850s through the 1930s the contributors show how issues of labor and class have been far more important in the formation of media institutions than previous accounts concede These essays recover the history of ethnic and cultural

diversity including the contributions of women that have enriched the process of communication      Political Commentators in the United States in the 20th Century Dan D. Nimmo, Chevelle Newsome, 1997-04-22 Devoid of technical jargon this bio critical sourcebook is a unique accounting of the careers of significant political commentators of the 20th century including print and broadcast journalists scholars and political consultants It offers insights into the rise and demise of political commentary and future possibilities for an informed citizenry In 40 separate bio critiques covering 42 of the 20th century s most significant political commentators this book traces the evolution of technical political commentary through four phases the didactic phase of commentary via the newspaper columnist 1914 1928 the interpretive phase associated with broadcast commentary during the golden age of radio 1929 1948 the entertainment phase of the TV era 1949 1980 and the opinionated phase ushered in by the diversification and proliferation of targeted communications media in the final two decades of the century The volume describes in detail the achievements and failures of each communicator s career in contributing to the rise and demise of political commentary across the four phases of development      **Mass Communications Research Resources** Christopher Sterling, James K. Bracken, Susan M. Hill, 2016-05-06 This reference book is designed as a road map for researchers who need to find specific information about American mass communication as expeditiously as possible Taking a topical approach it integrates publications and organizations into subject focused chapters for easy user reference The editors define mass communication to include print journalism and electronic media and the processes by which they communicate messages to their audiences Included are newspaper magazine radio television cable and newer electronic media industries Within that definition this volume offers an indexed inventory of more than 1 400 resources on most aspects of American mass communication history technology economics content audience research policy and regulation The material featured represents the carefully considered judgment of three experts two of them librarians plus four contributors from different industry venues The primary focus is on the domestic American print and electronic media industries Although there is no claim to a complete census of all materials on print journalism and electronic media what is available is now too vast for any single guide the most important and useful items are here The emphasis is on material published since 1980 though useful older resources are included as well Each chapter is designed to stand alone providing the most important and useful resources of a primary nature organizations and documents as well as secondary books and reports In addition online resources and internet citations are included where possible      Bad News Rob Brotherton, 2020-05-14 From the bestselling author of *Suspicious Minds* There was a time when the news came once a day in the morning newspaper A time when the only way to see what was happening around the world was to catch the latest newsreel at the movies Times have changed Now we re inundated The news is no longer confined to a radio in the living room or to a nightly half hour timeslot on the television Pundits pontificate on news networks 24 hours a day We carry the news with us getting instant alerts about events around the globe Yet despite this unprecedented abundance of information it seems increasingly difficult to know what s true

and what's not In *Bad News* Rob Brotherton delves into the psychology of news reviewing how the latest research can help navigate this supposedly post truth world Which buzzwords describe psychological reality and which are empty sound bites How much of this news is unprecedented and how much is business as usual Are we doomed to fall for fake news or is fake news fake news There has been considerable psychological research into the fundamental questions underlying this phenomenon How do we form our beliefs and why do we end up believing things that are wrong How much information can we possibly process and what is the internet doing to our attention spans Ultimately this book answers one of the greatest questions of the age how can we all be smarter consumers of news
