Agricultural sciences are large multidisciplinary fields which encompass the parts of exact life science, economic and social sciences that are used in the practice and understanding of agriculture research. The Agricultural sciences revolution has opened up systematic investigations and engineering designs for biological systems. Agricultural sciences are emerging as two complementary approaches which embody the breakthrough in biology and invite application of engineering principles. Agricultural science emphasizes the similarity between agricultural biology and engineering at the system level, which is important for applying agricultural systems and engineering theories to biological problems. New technologies such as biotechnology, bioinformatics, computer sciences and technological advances have made it possible to develop new research fields including genetic engineering, agrophysics, plant genomics, improved statistical analysis and precision farming. More to this as above are the natural and human sciences of agricultural science which seek to understand the human nature interactions of traditional agriculture including interaction of religion and agriculture and the non-material components of agricultural production systems.

Encyclopedia of Agricultural Sciences: Volume III Laura Vivian, 2015-02-13

Agricultural science is a multidisciplinary field of study which encompasses the diversified practices of agriculture and their implementation in varied fields of science and technology. It comprises advanced production techniques, pest control, minimizing adverse environmental effects, research and development of food production techniques to meet global requirements and many other topics. The agricultural science prospered during the eighteenth century when the study of fertilizers and plant physiology gained pace. In the twenty-first century, the technological advancements have revolutionized the science of agriculture. Biotechnology, genetic engineering, precision farming and such fields have given a new direction to agriculture science.
