Arizona Place Names Will Croft Barnes, 1988-02 Will Croft Barnes 1858-1937 first came to Arizona as a cavalryman and went on to become a rancher, state legislator, and conservationist. From 1905 to 1935, his travels throughout the state largely on horseback enabled him to gather the anecdotes and geographical information that came to constitute Arizona Place Names. For this first toponymic encyclopedia of Arizona, Barnes compiled information from published histories, federal and state government documents, and reminiscences of old timers, Indians, Mexicans, cowboys, sheep herders, historians, and everybody who had a story to tell as to the origin and meaning of Arizona names. The result is a book chock full of oddments, humor, and now forgotten lore which belongs on the night table as well as in the glove compartment. Barnes' original Arizona Place Names has become a booklover's favorite and is much in demand. The University of Arizona Press is pleased to reissue this classic of Arizoniana, which remains as useful and timeless as it was more than half a century ago.

The Diné Hogan Lillian Makeda,2024-06-28 Over the course of their history the Navajo Din have constructed many types of architecture but during the 20th century one building emerged to become a powerful and inspiring symbol of tribal culture This book describes the rise of the octagonal stacked log hogan as the most important architectural form among the Din The Navajo Nation is the largest Indian reservation in the United States and encompasses territory from within Arizona New Mexico and Utah where thousands of Native American homes called hogans dot the landscape Almost all of these buildings are octagonal Whether built from plywood nailed onto a wood frame or with other kinds of timber construction octagonal hogans derive from the stacked log hogan a form which came to prominence around

the middle of the last century The stacked log hogan has also influenced public architecture and virtually every Din community on the reservation has a school senior center office building or community center that intentionally evokes it Although the octagon recurs as a theme across the Navajo reservation the inventiveness of vernacular builders and professional architects alike has produced a wide range of octagonally inspired architecture Previous publications about Navajo material culture have emphasized weaving and metalwork overlooking the importance of the tribe s built environment But populated by an array of octagonal public buildings and by the hogan one of the few Indigenous dwellings still in use during the 21st century the Navajo Nation maintains a deep connection with tradition This book describes how the hogan has remained at the center of Din society and become the basis for the most distinctive Native American landscape in the United States The Din Hogan A Modern History will appeal to scholarly and educated readers interested in Native American history and American architecture It is also well suited to a broad selection of college courses in American studies cultural geography Native American art and Native American architecture
