The Uncanny Muse David Hajdu, 2025-02-04 One of Literary Hub's Most Anticipated Books of 2025 An acclaimed critic journalist and songwriter musician tells the story of art's relation to machines from the Baroque period to the age of AI What does it mean to be human in a world where machines too can be artists The Uncanny Muse explores the history of automation in the arts and delves into one of the most momentous and controversial aspects of AI artificial creativity The adoption of technology and machinery has long transformed the world but as the potential for artificial intelligence expands David Hajdu examines the new increasingly urgent questions about technology's role in culture From the life size mechanical doll that made headlines in Victorian London to the doll's modern AI pop star counterpart Hajdu traces the fascinating varied ways in which inventors and artists have sought to emulate mental processes and mechanize creative production For decades machines and artists have engaged in expressing the human condition along with the condition of living with machines through player pianos broadcasting technology electric organs digital movie effects synthesizers and motion capture By communicating and informing human knowledge the machines have exerted considerable influence on the history of art and often more influence than humans have been willing to recognize As Hajdu

proclaims before machine learning there was machine teaching With thoughtful wide ranging and surprising turns from Berry Gordy and George Harrison to Andy Warhol and Stevie Wonder David Hajdu takes a novel and contrarian approach he sees how machines through the ages have enabled creativity not stifled it and *The Uncanny Muse* sees no reason why this shouldn't be the case with AI today

Machine Music Morten Riis, 2016-05-13 Sound and music is a product of technology Whether we are enjoying a concert working in a sound studio or listening with headphones on technical equipment lays the foundation of our musical experience In *Machine Music* A Media Archaeological Excavation postdoc composer and PhD Morten Riis tunes into normally undetected layers of music Musical machines be it ancient or modern instruments computers loudspeakers or amplifiers are not just silent mediators of sounds They all have their own unique voices We simply have to learn to listen to them

Sound Actions Alexander Refsum Jensenius, 2022-12-13 A techno cognitive look at how new technologies are shaping the future of musicking Musicking encapsulates both the making of and perception of music so it includes both active and passive forms of musical engagement But at its core it is a relationship between actions and sounds between human bodies and musical instruments Viewing musicking through this lens and drawing on music cognition and music technology *Sound Actions* proposes a model for understanding differences between traditional acoustic sound makers and new electro acoustic music makers What is a musical instrument How do new technologies change how we perform and perceive music What happens when composers build instruments performers write code perceivers become producers and instruments play themselves The answers to these pivotal questions entail a meeting point between interactive music technology and embodied music cognition what author Alexander Refsum Jensenius calls embodied music technology Moving between objective description and subjective narrative of his own musical experiences Jensenius explores why music makes people move how the human body can be used in musical interaction and how new technologies allow for active musical experiences The development of new music technologies he demonstrates has fundamentally changed how music is performed and perceived
