The Modern Construction and Postmodern Deconstruction of Self

Kire Sharlamanov, Mia Kostovska, 2025-02-21 This book aims to explain the self as understood decades ago and its evolution in the time of postmodernism Approaching it primarily from a sociological perspective while incorporating insights from psychology and philosophy it portrays the modern self as a unitary coherent unified subject created in the time of modernity which during postmodernism has evolved into a fluid decentralized and fragmented subject with increasingly independent multiple identities The creation of the modern self has been influenced by individualization rationalization and power Each factor is explored in a separate chapter detailing its impact on the development of the modern Cartesian self The authors draw on the theories of Goffman Bauman and Baudrillard to illustrate the changing nature of the self viewing it as a performer a fluid entity and a simulacrum While Goffman is not strictly a postmodern author his ideas foreshadow postmodernism particularly regarding the transformation of the self Bauman and Baudrillard as key figures in postmodern thought provide valuable insights into this transformation of the self in contemporary times The book uniquely connects two time periods in which the self evolves arguing that social factors influence its changing characteristics As these social factors shift over time so does the self Key aspects of the self and its evolution are examined through an original multidimensional approach that spans a longer time interval

Galen, De diebus decretoriis, from Greek into Arabic

Glen M. Cooper, 2017-03-02 This volume presents the first edition of the Arabic translation by Hunayn ibn Ishaq of Galen's Critical Days De diebus decretoriis together with the first translation of the text into a modern language The substantial introduction contextualizes the treatise within the Greek and Arabic traditions Galen's Critical Days was a founding text of astrological medicine In febrile illnesses the critical days are the days on which an especially severe pattern of symptoms a crisis was likely to occur The crisis was thought to expel the disease producing substances from the body If its precise timing were known the physician could prepare the patient so that the crisis would be most beneficial After identifying the critical days based on empirical data and showing how to use them in therapy Galen explains the critical days via the moon's influence In the historical introduction Glen Cooper discusses the translation of the Critical Days in Arabic and adumbrates its possible significance in the intellectual debates and political rivalries among the 9th century Baghdad elite It is argued that Galen originally composed the Critical Days both to confound the Skeptics of his own day and to refute a purely mathematical rationalist approach to science These features made the text useful in the rivalries between Baghdad scholars Al Kindi d c 866 famously propounded a mathematical approach to science akin to the latter The scholar bureaucrat responsible for funding this translation Muhammad ibn Musa d 873 al Kindi's nemesis may have found the treatise useful in refuting that approach The commentary and notes to the facing page translation address issues of translation as well as important
