easy for readers to zero in on particular time periods while a further reading list at the end of each essay serves as a gateway to further exploration and study High interest sidebars accompany many of the biographies offering more nuanced glimpses into the lives of these fascinating women **Library Journal** ,1993-07 The Library Journal ,1993 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately **Library Media Connection** ,2003 Forthcoming Books Rose Arny,1994-02 **The CD-ROM Directory 1996** ,1996 This 15th edition of a yearly report provides a guide to all CD ROM and multimedia titles published In addition to a full description of each title the book contains the names and addresses of all the publishers and information providers *Visions and Ideas of Europe during the First World War* Matthew D'Auria,Jan Vermeiren,2019-08-02 Given the destruction and suffering caused by more than four years of industrialised warfare and economic hardship scholars have tended to focus on the nationalism and hatred in the belligerent countries holding that it led to a fundamental rupture of any sense of European commonality and unity It is the central aim of this volume to correct this view and to highlight that many observers saw the conflict as a European civil war and to discuss what this meant for discourses about Europe Bringing together a remarkable range of compelling and highly original topics this collection explores notions images and ideas of Europe in the midst of catastrophe *Australian National Bibliography* ,1994 **The Philosophical Baby** Alison Gopnik,2025-06-25 For most of us having a baby is the most profound intense and fascinating experience of our lives Now scientists and philosophers are starting to appreciate babies too The last decade has witnessed a revolution in our understanding of infants and young children Scientists used to believe that babies were irrational and that their thinking and experience were limited Recently they have discovered that babies learn more create more care more and experience more than we could ever have imagined And there is good reason to believe that babies are actually smarter more thoughtful and even more conscious than adults This new science holds answers to some of the deepest and oldest questions about what it means to be human A new baby s captivated gaze at her mother s face lays the foundations for love and morality A toddler s unstoppable explorations of his playpen hold the key to scientific discovery A three year old s wild make believe explains how we can imagine the future write novels and invent new technologies Alison Gopnik a leading psychologist and philosopher as well as a mother explains the groundbreaking new psychological neuroscientific and philosophical developments in our understanding of very young children transforming our understanding of how babies see the world and in turn promoting a deeper appreciation for the role of parents **Multimedia and Videodisc Compendium** ,1996 One by One, the Stars Ned Stuckey-French,2022-05-01 A tireless and discerning advocate for contemporary practitioners of creative nonfiction Ned Stuckey French was at the center of every national discussion about the genre He greatly contributed to our scholarly understanding of the history of the essay and was working on his first essay collection when he died of cancer in 2019 That collection One by One the Stars presents new highly personal essays tracing

Stuckey French's childhood in Indiana and a burgeoning interest during adolescence in politics and social justice to his life as a father, teacher, and writer. Thematic threads connect these elements, and foremost is his growing commitment to activism on behalf of the disadvantaged, overlooked, or threatened. The volume also features some of Stuckey French's greatest hits as a public scholar and writer, including "Don't Be Cruel: An Argument for Elvis," "Our Queer Little Hybrid Thing," "Toward a Definition of the Essay," and his popular essay on his Facebook addiction for which he was widely known. Along the way, his stories and reflections offer fascinating and timely insights into family dynamics, history, politics, ecology, social justice, and literature. All of it is infused with Ned Stuckey French's guiding spirit: full of curiosity, compassion, and conviction.

**Memoirs of the Twentieth Century** Ugo Spirito, 2021-10-25 Ugo Spirito's *Memoirs of the Twentieth Century* is the intellectual autobiography of one of the most original and anticonformist contemporary Italian philosophers. In it, Spirito makes an evaluation of his long career spanning from the decade of the 20s to that of the 70s of the twentieth century as a thinker who was never satisfied with any theoretical or philosophical system while constantly aiming at finding a definitive truth, the incontrovertible or absolute. The various stages of his search deal with different philosophical and scientific systems, from positivism to actual idealism, from problematicism to omnicentrism, from scientism to neoproblematicism, revealing at the same time an inherent antinomic procedure that does not permit him to take any truth for granted. At the end of his life, Spirito realized that he could only be sure of his present state of unawareness, thus challenging the validity of his lifelong investigative activity. Man cannot know himself, Spirito wrote. Confronted with the manifestations of life and universe, he could not help but feel a sense of surprise and astonishment. Throughout his life, he was only a spectator of his destiny, not the conscious creator of it, as he believed in the early stage of his career. Consequently, he reached a position of negating any value system bordering on skepticism and nihilism. Within this context, he offered a post-modern interpretation of life. This interpretation was also Spirito's conclusion and, as such, implied a rethinking about other faiths, both political and ideological, that for more than fifty years would develop parallel to philosophical faith. Consequently, he revisited some of the most important philosophical and political personalities who interpreted or materialized those faiths: from Benedetto Croce to Gentile, from Benito Mussolini to Giovanni Bottai, from Togliatti to Pope Paul VI. Spirito was not a thinker who remained secluded within the ivory tower of pure investigation, but in an effort to modify society according to the principle of the identification of philosophy with life, he tried to act upon it by following thoughts with action. *Memoirs of the Twentieth Century* is divided into two parts: one purely autobiographical and theoretical, and the other more historical, where Spirito narrates his relationship with the above-mentioned personalities as a way of testing the validity of his beliefs. Indeed, one can perceive his moment of adherence to each of the different approaches expounded, only to subsequently detach himself from them. For the English-speaking reader, the second part will appear more interesting and poignant, since Spirito's involvement with history foretells the intellectual fate of a nation. *Memoirs of the Twentieth Century* is a reflection on life in which

personal history serves as a vehicle for judgment upon an entire century      *Ancestral Diets and Nutrition* Christopher Cumo, 2020-11-19 *Ancestral Diets and Nutrition* supplies dietary advice based on the study of prehuman and human populations worldwide over the last two million years This thorough accessible book uses prehistory and history as a laboratory for testing the health effects of various foods It examines all food groups by drawing evidence from skeletons and their teeth middens and coprolites along with written records where they exist to determine peoples health and diet Fully illustrated and grounded in extensive research this book enhances knowledge about diet nutrition and health It appeals to practitioners in medicine nutrition anthropology biology chemistry economics and history and those seeking a clear explanation of what humans have eaten across the ages and what we should eat now Features Sixteen chapters examine fat sweeteners grains roots and tubers fruits vegetables and animal and plant sources of protein Integrates information about diet nutrition and health from ancient medieval modern and current sources drawing from the natural sciences social sciences and humanities Provides comprehensive coverage based on the study of several hundred sources and the provision of over 2 000 footnotes Presents practical information to help shape readers next meal through recommendations of what to eat and what to avoid
