Fisher, Jr., 2017-12-22 In this tribute to Benjamin Wright former students and colleagues recall the foundational contributions he made to the theory and practice of measurement in a career spanning over five decades Wright is recognized as the foremost proponent of the psychometric approach of Georg Rasch a Danish mathematician whose ideas continue to provoke controversy Wright s colleagues and students and students of their students are leaders in educational research and practice around the world This volume relates the extent of Wright s influence far beyond education and psychology where his work in measurement began into health care and the social sciences at large The editors and

contributors all leading measurement scholars trace the development of themes in Wright's work identifying the roots of today's formative assessment methods the integration of quantitative and qualitative data and the contrast between scientific and statistical methods These previously unpublished papers reflect on Wright's lifelong passion for making measurement both more scientific and more meaningful They recount how Wright's insight energy and gregarious nature led him to produce multiple innovations in computing estimation methods model development fit assessment and reliability theory stimulating practical applications in dozens of fields serving on over 120 dissertation committees and founding several professional societies The volume includes three reprinted articles by Wright that provide insights into his early engagement with Rasch's ideas Psychological and Social Measurement will be welcomed by the broad international measurement community of professionals and researchers working in such diverse fields as education psychology health sciences management and metrology Scientists working in any field involving measurement science and technology will appreciate an inside look at this seminal figure and a new perspective on the expanding conversation across the sciences about measurement and the communication of meaningful transparent information

**Handbook of Research Design and Social Measurement** Delbert C. Miller, Neil J. Salkind, 2002-01-16 If a student researcher had only one handbook on their bookshelf Miller and Salkind's Handbook would certainly have to be it With the updated material the addition of the section on ethical issues which is so well done that I'm recommending it to the departmental representative to the university IRB and a new Part 4 on Qualitative Methods the new Handbook is an indispensable resource for researchers Dan Cover Department of Sociology Furman University I have observed that most instructors want to teach methodology their way to imbue the course with their own approach Miller Salkind allows one to do this easily The book is both conceptually strong e.g. very good coverage of epistemology research design and statistics and at the same time provides a wealth of practical knowledge scales indices professional organizations computer applications etc In addition it covers the waterfront of methodology Michael L Vasu Director of Information Technology North Carolina State University A unique and excellent reference tool for all social science researchers and a good textbook for graduate students and senior year undergraduate classes These students are about to enter the real life of research and need a handy and comprehensive tool as a starting point that offers shortcuts for getting into real research projects For a small project the book offers enough information to get the project started For big projects the book is ideal for information on where to look for things and examples Jianhong Liu Department of Sociology Rhode Island College The book considered a necessity by many social science researchers and their students has been revised and updated while retaining the features that made it so useful The emphasis in this new edition is on the tools graduate students and more advanced researchers need to conduct high quality research Features Benefits Provides step by step instruction for students research training by beginning with how to find a creative idea a middle range theory and initial hypothesis and proceeds through design proposal collection and analysis of data followed by writing reporting and
