Jorstad, 1993-04-22 The enormous growth of evangelicalism is one of the major developments in recent American life Like other scholars Jorstad acknowledges that evangelicalism has grown because it is theologically attractive But Jorstad also attributes the growth of the evangelical movement to its relationship with American popular culture According to the author the evangelical movement was able to integrate populist democratic traditions with a cultural inclusiveness a mastery of high technology and a willingness to use mass media to spread its views The book contains three sections The first traces the development of evangelical subculture between 1960 and 1990 The second part discusses the evangelical movement and social and individual values The third part explores popular religion and the media The book considers the involvement of evangelicals in popular religion the appeal of popular religion to many but not to all evangelicals the similarities between popular religion and more traditional religious organizations and the means by which evangelicalism effectively utilizes the many genres and styles of popular culture Prayers in Stone Paul Eli Ivey, 1999 The classical revival style of architecture made famous by the 1893 World's Columbian Exposition in Chicago left its mark on one of the most sustained classical building movements in American architectural history the Christian Science church building movement By 1920 every major American city and many smaller towns contained an example of this architecture financed by the followers of Mary Baker Eddy the church's founder These buildings represented a new burgeoning American institution that appealed to business people and to young men and women working to succeed Characterized by middle class congregations that in the early part of the century were over 75 percent women Christian Science suggested radical civic reform solutions based on an idealistic and pragmatic individualism It attracted criticism from traditional churches and from the medical establishment due to its rapid growth and to its reinstatement of primitive Christianity's lost elements of physical healing and moral regeneration Prayers in Stone spins out the close connections between Christian Science church architecture and its social context This architecture served as a focal point for debates over the possibilities for a new twentieth century urban architecture that proponents believed would positively shape the behavior of citizens Thus these buildings played a critical role in discussions concerning religious and secular architecture as major elements of religious and social reform Drawing on a wide range of documentary evidence including material from the archives of the Mother Church in Boston Paul Ivey uses Christian Science architecture to explore the social implications of architectural styles and new building technologies to illuminate class based notions of civic reform and beautification and to investigate the use of architecture to bring about religious and social change In addition the book explores complex gender issues including early attempts to define a professional space for women as Christian Science practitioners Lavishly illustrated Prayers in Stone focuses on four major city arenas of Christian Science building Boston Chicago New York and the San Francisco Bay area to demonstrate the vital intersection of architecture and

Old Wisdom in the New World Paul David Numrich, 1999-08 Focusing on two well-established institutions, one in Chicago, the other in Los Angeles, *Old Wisdom in the New World* is the first systematic examination of the growing presence of Theravada Buddhist temples in the United States. Paul David Numrich's socio-historical analysis highlights a number of classic Americanization themes of establishment, growth, and adaptation. These have surfaced, the author shows, in debates over the retention of Old World culture and language, the problem of the second generation, and the role of the laity in religious institutions. Going beyond such familiar themes, Numrich also uncovers the intriguing phenomenon of ethnically defined parallel congregations in these temples as he reveals the ways in which Asian immigrant Buddhists and American converts pursue substantively different expressions of the Theravada tradition under the direction of a shared clerical leadership, the resident monks. In the author's view, these Theravada case studies underline the complexity of the present Americanization process. By examining the intersection of two important trends, the steady growth of Asian immigration and an increasing indigenous interest in new religious movements, especially those of Asian origin, this book points to some fascinating new directions for the study of religious and cultural diversity in the United States. The Author, Paul David Numrich, is a research associate in the Religion in Urban America Program at the University of Illinois at Chicago. **The**
