South of the Sahara *Almanac of African Peoples and Nations* Mohamad Yakan, 2017-11-30 The peoples of Africa are neither ethnically culturally nor religiously homogeneous European colonial powers took little note of this reality in carving up the continent a fact reflected in the periodic outbreak of civil war since decolonialization Likewise Western European models of development whether in their liberal or Marxist manifestations have so far failed to meet African development needs The path to stability in Africa is through its people's character and goals *Almanac of African Peoples and Nations* provides an essential guide to the major ethnic groups of the African continent highlighting the major contributions and basic features of each The *Almanac* reviews Africa's language families and their respective national and geographic concentrations explaining ethnic classification based on linguistic difference and including language groups that are not indigenous to Africa The major African peoples are then listed by country with a statistical breakdown on their respective shares in the total population of each country and maps indicating their concentration The major section of the volume includes a comprehensive listing and descriptive profile of each ethnic national and tribal group detailing their history customs economic systems and political and social organizations The *Almanac* points out as well which groups support revisionist political aspirations and shows the internal and external pressures they are subject to Yakan notes that African societies are not highly integrated and must support multitudes of influential sub cultures with conflicting agendas and loyalties Arguing that tribalism reflects Africa's historical experience and cultural heritage he sees the resolution of the continent's problems in consociational democracy proportional representation federalism or some form of autonomous rule Ibileye: Studies in Media and Ideological Represe Gbenga Ibileye, 2023-05-05 This book features articles from a spectrum of perspectives that are considered of direct consequence for the discourse on the conflict between herders and farmers in Nigeria These perspectives include those from the broad ambit of social sciences and specifically views from history and political science in order to provide a broad historical ground for the understanding of the century old fissures between ethnic nationalities which have burgeoned into contemporary conflicts and violence **Ethnomusicology** Jennifer Post, 2004-03-01 *Ethnomusicology A Research and Information Guide* is an annotated bibliography of books recordings videos and websites in the field of ethnomusicology The book is divided into two parts Part One is organised by resource type in categories of greatest concern to students and scholars This includes handbooks and guides encyclopedias and dictionaries indexes and bibliographies journals media sources and archives It also offers annotated entries on the basic literature of ethnomusicological history and research Part Two provides a list of current publications in the field that are widely used by ethnomusicologists Multiply indexed this book serves as an excellent tool for librarians researchers and scholars in sorting through the massive amount of new material that has appeared in the field over the past decades **Experimenting with Social Norms** Jean Ensminger, Joseph Henrich, 2014-10-22 Questions about the origins of human cooperation have long puzzled and divided scientists Social norms that foster fair minded behavior altruism and collective action undergird the

foundations of large scale human societies but we know little about how these norms develop or spread or why the intensity and breadth of human cooperation varies among different populations What is the connection between social norms that encourage fair dealing and economic growth How are these social norms related to the emergence of centralized institutions Informed by a pioneering set of cross cultural data Experimenting with Social Norms advances our understanding of the evolution of human cooperation and the expansion of complex societies Editors Jean Ensminger and Joseph Henrich present evidence from an exciting collaboration between anthropologists and economists Using experimental economics games researchers examined levels of fairness cooperation and norms for punishing those who violate expectations of equality across a diverse swath of societies from hunter gatherers in Tanzania to a small town in rural Missouri These experiments tested individuals willingness to conduct mutually beneficial transactions with strangers that reap rewards only at the expense of taking a risk on the cooperation of others The results show a robust relationship between exposure to market economies and social norms that benefit the group over narrow economic self interest Levels of fairness and generosity are generally higher among individuals in communities with more integrated markets Religion also plays a powerful role Individuals practicing either Islam or Christianity exhibited a stronger sense of fairness possibly because religions with high moralizing deities equipped with ample powers to reward and punish encourage greater prosociality The size of the settlement also had an impact People in larger communities were more willing to punish unfairness compared to those in smaller societies Taken together the volume supports the hypothesis that social norms evolved over thousands of years to allow strangers in more complex and large settlements to coexist trade and prosper Innovative and ambitious Experimenting with Social Norms synthesizes an unprecedented analysis of social behavior from an immense range of human societies The fifteen case studies analyzed in this volume which include field experiments in Africa South America New Guinea Siberia and the United States are available for free download on the Foundation s website [www.russellsage.org](http://www.russellsage.org)

**Alternatives in Mobilization** Jóhanna Kristín Birnir, Nil Seda Şatana, 2022-05-26 What determines which identity cleavage ethnicity or religion is mobilized in political contestation be it peaceful or violent In contrast to common predictions that the greatest contention occurs where identities are fully segmented most identity conflicts in the world are between ethnic groups that share religion Alternatives in Mobilization builds on the literature about political demography to address this seeming contradiction The book proposes that variation in relative group size and intersection of cleavages help explain conundrums in the mobilization of identity across transgressive and contained political settings This theory is tested cross nationally on identity mobilization in civil war and across violent conflict in Pakistan Uganda Nepal and Turkey and peaceful electoral politics in Indonesia This book helps illustrate a more accurate and improved picture of the ethnic and religious tapestry of the world and addresses an increasing need for a better understanding of how religion contributes to conflict
