Ellis,2006 Simon Episcopius 1583 1643 who began his theological career as the prot g of Jacobus Arminius led the Arminians at the Synod of Dort and was instrumental in guaranteeing Arminianism s survival This book breaks new ground by clearly showing how in the process of working out the implications of the theological trajectories which Arminius established Episcopius introduced significant changes in his master s theology It begins by demonstrating changes between Episcopius early theological works and Arminius writings and then even greater changes in his mature theological work *Institutiones Theologicae* It defends the idea that Arminianism represented a pre Calvinist movement within the Netherlands which not only rejected Genevan predestination but also intentionally moved away from Reformed Scholasticism This book is useful for seminars in early Arminian theology and the Arminian controversy in the Netherlands

**The Nature of Man and God** Simon S. Godfrey,2003 The search for understanding the meaning of the self and the nature of the Supreme Being has been the nub problem in history Although these concepts have been expounded in all ages by innumerable philosophers theologians and other writers the fact that they still remain nebulous indicates that more work is warranted in these perennial areas *The Nature of Man and God* deals with these two fundamental issues in a clear concise and down to earth manner As a psychologist the author has spent some thirty years investigating the issues in question The study of the self led him willy nilly to the reality of something that William James called a More or something that is popularly known as God The author found close affinity between the reality of the self and the reality of the Deity Owing to this affinity the author proposes that a more palpable way of knowing the Deity is to know one s own true self On the subject of the self the author distinguishes between two types a nominal self which is a mere echo of the early experiences of the individual and a transcendental self the latter can be realized only when human beings set themselves to unlearn what they have been taught on such matters rely on their inner resources and become their own gurus instead of following the instructions of self proclaimed authorities Regarding the Divine nature the author puts forth several challenging new theses In particular he enlarges on matters relating to ultimate concerns the human task freedom of will

responsibility and theodicy explicating why there is evil and suffering in the world The book invites the reader to reach for a higher plain of humanness The topics covered are pivotal as the whole of humankind does indeed pivot around them It is the author's conviction that none of the current personal or international crises can be effectively resolved until humans first learn who they are and what genre of supratemporal intellect powers the scheme of things in the world The book should appeal to multiple audiences at a time when it seems nothing can disentangle the state of human affairs there is a crying need for this kind of book In particular it should prove of great interest to all those sincerely seeking to know themselves and their God the book also provides a workable tool for those seriously involved in improving the human lot or those weary of ongoing superficialities and trivialities of modern life
