Approximately 1.3 billion people live in South Asia covering Bangladesh, India, Pakistan and Sri Lanka, the majority of whom live in rural areas and agriculture is a key part of the region's economy accounting for over a quarter of GDP. The further opening of international markets to agricultural exports from South Asia promises to raise the standard of living in this region which contains an estimated 40 per cent of the world's poor defined as those living on less than \$1 a day. However, the Agreement on Agriculture (AoA) which established a rules-based system of agricultural trade has not provided the expected benefits for developing countries. This publication contains a compilation of studies presented at a regional conference sponsored by the World Bank and held in New Delhi, India, in 1999. These updated studies examine a number of issues involved in ensuring these countries can maximise opportunities in future trade negotiations.

Food Standards and Safety in a Globalised World Sri Ram Khanna, Madhu Saxena, 2003. The Food and Agricultural Organisation (FAO) and the World Health Organisation (WHO) have increased the awareness of consumers regarding food safety and related issues. The International Food Standards Body (Codex Alimentarius Commission) has done pioneering work for the development of food standards. The process to reform the Codex system in a globalising world is highlighted in this book. This book addresses diverse perspectives of food safety issues for consumer education and awareness. Preferences for vegetarian food are based on religious, cultural and moral values. In India, infant food safety issues, Codex standards and the WTO have also been dealt with in detail to inform readers about the problems world markets face. The dangers arising from aggressive marketing, viz. infant mortality, malnutrition and disabilities in children, have also been examined. The present work has been compiled on behalf of Consumer Voice Org. as a reference book for consumers, students, food technologies scientists, consultants, food safety officials, research workers and law makers working in this field to understand how food safety may not be sacrificed for commerce.
