Encounters With Infinity A Metamathematical Dissertation:

Encounters with Infinity Michael Van Laanen, 2002-02 The original title of this manuscript was Pages A Voyage to Infinity It's kinda like Walt Whitman's Leaves of Grass a collection of poems with an underlying mystical theme My dissertation is a kaleidoscope puzzle of images and thoughts and concepts and ideas taken from mysticism science logic and mathematics The end result as the puzzle pieces are linked together is a new portrait of Number The reader is challenged to solve a conceptual picture puzzle using the chaotic scattering of puzzle pieces set forth in the thesis Some of the pieces challenge established ideas Some of the pieces are decoys leading to dead ends Some are background Others are transition pieces And there are pieces that give the reader glimpses of me the writer of this thesis So exactly what is infinity As the pieces of the puzzle are put together a new concept of infinity emerges a concept that may be of interest to the mystics the philosopher the quantum physicist and mathematicians who are open to a new window through which to view reality

Encounters with Infinity Michael Van Laanen, 2004 **The Riddle of the Infinite or Ananta** Jayant Burde, 2019 This book explores the bizarre but fascinating world of infinity in different disciplines of knowledge mathematics science philosophy and religion It projects the views of eastern as well as western scholars This world is not only mysterious but also treacherous and conceals many conundrums such as a multitude of infinities the mystic's experience of the infinite conception of God as absolute infinity The author also discusses many paradoxes relating to space and time It is interesting to discover that some eastern philosophies try to reconcile two opposite concepts of sunya zero and Ananta the infinite The author also ventures to address a difficult question Does infinity exist as a physical reality Kurt Gödel: Collected Works: Volume IV Kurt Gödel, 1906-1978 was the most outstanding logician of the twentieth century These collected works form the only comprehensive edition of Gödel's work available and are designed to be useful and accessible to as wide an audience as possible without sacrificing scientific or historical accuracy Correspondence A-G Kurt Gödel, 1986

Beyond Formal Operations Michael L. Commons, Francis A. Richards, Cheryl Armon, 1984 Examines the nature of late adolescent and adult thought and concludes that there is describable and significant cognitive development during those stages of life which goes beyond Piaget's stage of formal operations **Choice**, 2005 **Infinity, Paradoxes and Contexts** Chanakya Janak Wijeratne, 2015 This dissertation explores conceptions of infinity of undergraduate students using paradoxes of infinity as a research tool My particular attention is on the role of context in which each paradox is presented on students attempts to address seemingly paradoxical situations This dissertation is structured around four stand alone papers with an introductory chapter and a concluding chapter The first paper is a study on the struggles of a group of undergraduate liberal arts students in engaging with the super tasks in the Thomson's Lamp paradox as well as the paradox of Green Alien which is an isomorphic version of Thomson's Lamp presented in a fictitious setting This study shows that the participants have a robust process view of the infinite iterative processes in the super tasks and that even the new totality

stage in the APOS perspective is difficult for them to reach Painter's Paradox and the struggles of a group of undergraduate Calculus students in engaging with this paradox is the focus of the second paper. Findings of this study indicate that the participants' difficulty in reconciling the finite volume of the infinitely long Gabriel's horn could be an epistemological obstacle or a didactic obstacle. The third paper explores how the thinking of a group of mathematics honours undergraduate students is affected by the context in Polygons Task Data in this study suggests an extension of the Same A same B intuitive rule of Tirosh and Stavy 1999 to an infinite sequence of objects. The last paper develops variants of the well known Hilbert's Grand Hotel paradox by introducing room fees and discusses how these variants can be used in Calculus instruction. Participants found the cognitive conflicts elicited by the paradoxes difficult to resolve but they seem to improve their problem solving heuristics and metacognitive skills by engaging with the paradoxes. In Painter's Paradox Thomson's Lamp and Green Alien many participants reduced the level of abstraction by contextualizing further and avoided resolution. Decontextualization seemed to be very difficult for the participants. Findings in this dissertation suggest that the context of a paradox could be a hindrance that diverts students' attention from addressing the situation mathematically. *Infinity and Experience* Lisa Ann Sereno, Massachusetts Institute of Technology. Department of Linguistics and Philosophy, 1998.
