Representing the South Pacific Rod Edmond, 1997-11-20 This book examines how the South Pacific was represented by explorers missionaries travellers writers and artists between 1767 and 1914 by drawing on history literature art history and anthropology Edmond engages with colonial texts and postcolonial theory criticising both for their failure to acknowledge the historical specificity of colonial discourses and cultural encounters and for continuing to see indigenous cultures in essentially passive or reactive terms The book offers a detailed and grounded reading back of these colonial discourses into the metropolitan centres which gave rise to them while resisting the idea that all representations of other cultures are merely self-representations Among its themes are the persistent myth-making around the figure of Cook the western obsession with Polynesian sexuality tattooing cannibalism and leprosy and the Pacific as a theatre for adventure and as a setting for Europe's displaced fears of its own cultural extinction

Photographing Papua Max Quanchi, 2009-03-26 Photographing Papua is a study of photography in the public domain in the late nineteenth and early twentieth centuries It argues that southeastern New Guinea known as British New Guinea and then as Papua when it became an Australian colony was created as a geographical place through visual representation in illustrated magazines and newspapers lavishly illustrated travelogues and mission hagiography serial encyclopedia lantern slides and postcards Readers knew Papua because many thousands of black and white photographs of Papuans villages and material culture rapidly swamped the reading public once the process of halftone newsprint reproduction became possible In an innovative

and breakthrough fashion Photographing Papua switches attention from a few well known prints in museums and archives in some cases repeatedly reproduced but mostly rarely seen outside of scientific and scholarly circles It deals instead with thousands of photographs often used in ways not intended when the photograph was taken but which editors and publishers and subsequent photographers gradually made conform to an iconographic imperative a sort of abbreviated visual gallery of natives and a quick access pathway to the actual and imagined lives of Papuans in the last Unknown as New Guinea was titled It is a study of representation colonialism cross cultural encounters and the early world of illustrated media and photo journalism

A History of the World in 100 Objects Neil MacGregor, 2011-10-27 An enthralling and profoundly humane book that every civilized person should read The Wall Street Journal The blockbuster New York Times bestseller and the companion volume to the wildly popular radio series When did people first start to wear jewelry or play music When were cows domesticated and why do we feed their milk to our children Where were the first cities and what made them succeed Who developed math or invented money The history of humanity is one of invention and innovation as we have continually created new things to use to admire or leave our mark on the world In this groundbreaking book Neil MacGregor turns to objects that previous civilizations have left behind to paint a portrait of mankind's evolution focusing on unexpected turning points Beginning with a chopping tool from the Olduvai Gorge in Africa and ending with a recent innovation that is transforming the way we power our world he urges us to see history as a kaleidoscope shifting interconnected constantly surprising A landmark bestseller A History of the World in 100 Objects is one of the most unusual and engrossing history books to be published in years None could have imagined quite how the radio series would permeate the national consciousness Well over 12.5 million podcasts have been downloaded since the first programme and more than 550 museums around Britain have launched similar series featuring local history MacGregor's voice comes through as distinctively as it did on radio and his arguments about the interconnectedness of disparate societies through the ages are all the stronger for the detail afforded by extra space A book to savour and start over The Economist

Imperial Islands Joseph R. Hartman, 2021-11-30 When the USS Maine mysteriously exploded in Havana's harbor on February 15 1898 the United States joined local rebel forces to avenge the Maine and liberate Cuba from the Spanish empire Remember the Maine To Hell with Spain So went the popular slogan Little did the Cubans know that the United States was not going to give them freedom in less than a year the American flag replaced the Spanish flag over the various island colonies of Cuba Guam Puerto Rico and the Philippines Spurred by military successes and dreams of an island empire the US annexed Hawaii in that same year even establishing island colonies throughout Micronesia and the Antilles With the new governmental orders of creating new art architecture monuments and infrastructure from the United States the island cultures of the Caribbean and Pacific were now caught in a strategic scope of a growing imperial power These spatial and visual objects created a visible confrontation between local indigenous African Asian Spanish and US imperial expressions These material and visual histories often go

unacknowledged but serve as uncomplicated proof for the visible confrontation between the US and the new island territories. The essays in this volume contribute to an important art historical visual cultural architectural and materialist critique of a growing body of scholarship on the US Empire and the War of 1898. *Imperial Islands* seeks to reimagine the history and cultural politics of art architecture and visual experience in the US insular context. The authors of this volume propose a new direction of visual culture and spatial experience through nuanced terrains for writing envisioning and revising US American Caribbean and Pacific histories. These original essays address the role of art and architecture in expressions of state power racialized and gendered representations of the United States and its island colonies and forms of resistance to US cultural presence. Featuring interdisciplinary approaches, *Imperial Islands* offers readers a new way of learning the ongoing significance of vision and experience in the US empire today, particularly for Caribbean Latinx Pilipinx and Pacific Island communities.

Robert Louis Stevenson's Pacific Impressions Carla Manfredi, 2018-11-11 This book tackles photography's role during Robert Louis Stevenson's travels throughout the Pacific Island region and is the first study of his family's previously unpublished photographs. Cutting across disciplinary boundaries, the book integrates photographs with letters, non-fiction, and poetry and includes much unpublished material. The original readings of photographs and non-fiction highlight Stevenson's engagement with colonial ideology and reality and advance new arguments about Victorian travel, settlement, and colonialisms in the Pacific. Like the Stevensons, the book moves from the Marquesas to the atolls of the Gilbert Islands in Micronesia, from the Kingdom of Hawai'i's political ambitions to Samoan plantations and the Stevensons' settlement at Vailima. Central to this study is the notion that Pacific history and Pacific Island cultures matter to the interpretation of Stevenson's work, and a rigorous historical and cultural contextualization ensures that local details structure literary and photographic interpretation. The book's historical grounding is key to its insightful conclusions regarding travel, settlement, photography, and colonialism.

studies as told by one of its founders and most highly regarded scholars. Wielding intellectual energy, critical acumen, and a sly sense of humor, Sucheng Chan discusses her experiences on three campuses within the University of California system as Asian American studies was first developed in response to vehement student demand under the rubric of ethnic studies.
