Ulrich Gebhard,Armin Lude,Andrea Möller,Alexandra Moormann,2025-10-11 Experiencing nature has positive effects on mental development health and well being and can be interpreted as an element of a good life This book relates this connection to learning and educational settings Educational processes in biology education are defined not only by the acquisition of relevant subject matter but also about the encounter confrontation and transformation of the self The central assumptions of this book are firstly that the latter can be facilitated through nature experiences and secondly that this can also positively influence subject specific learning processes      **Encounters in Thought** Aaron K. Kerr,2019-10-17 Thinking is a dynamic process resulting from practices of integration Thought encounters in openness wonder receptivity and contemplation confer upon us intellectual work that is uniquely our own Digital patterns however distract us from these creative encounters Our intellectual searching is weakened and fragmented by frenetic consumption of information We miss out on reason s innate pull toward integration and concrete reality This book is an invitation to enter into openness wonder receptivity and contemplation with deeper understanding and intentionality We can do this by considering exemplars persons who lived out the integrity of their hard won beliefs Each process of integration is applied also so that practical knowledge and practice become a way into this intellectual restoration We need deeper knowledge won in the slow orbit of encounters Encounters in thought are precisely what each generation needs to apprehend the cosmos nature authority truth and moral action Responsibility to this ecologic age requires a reform of reason this book is just one attempt to convey a way toward this restoration      **Ignoring Nature No More** Marc Bekoff,2013-06-01 For far too long humans have been ignoring nature

As the most dominant overproducing overconsuming big brained big footed arrogant and invasive species ever known we are wrecking the planet at an unprecedented rate And while science is important to our understanding of the impact we have on our environment it alone does not hold the answers to the current crisis nor does it get people to act In Ignoring Nature No More Marc Bekoff and a host of renowned contributors argue that we need a new mind set about nature one that centers on empathy compassion and being proactive This collection of diverse essays is the first book devoted to compassionate conservation a growing global movement that translates discussions and concerns about the well being of individuals species populations and ecosystems into action Written by leading scholars in a host of disciplines including biology psychology sociology social work economics political science and philosophy as well as by locals doing fieldwork in their own countries the essays combine the most creative aspects of the current science of animal conservation with analyses of important

psychological and sociocultural issues that encourage or vex stewardship The contributors tackle topics including the costs and benefits of conservation behavioral biology media coverage of animal welfare conservation psychology and scales of conservation from the local to the global Taken together the essays make a strong case for why we must replace our habits of domination and exploitation with compassionate conservation if we are to make the world a better place for nonhuman and human animals alike

*Uncommon Ground: Rethinking the Human Place in Nature* William Cronon, 1996-10 This collection of essays historicizes the divorce of the natural from the human and shows that nature is a human construction arguing that what we have constructed we can reconstruct

*Kinship to Mastery* Stephen R. Kellert, 2003-10 *Kinship to Mastery* is a fascinating and accessible exploration of the notion of biophilia the idea that humans having evolved with the rest of creation possess a biologically based attraction to nature and exhibit an innate affinity for life and lifelike processes Stephen R Kellert sets forth the idea that people exhibit different expressions of biophilia in different contexts and demonstrates how our quality of life in the largest sense is dependent upon the richness of our connections with nature While the natural world provides us with material necessities food clothing medicine clean air pure water it just as importantly plays a key role in other aspects of our lives including intellectual capacity emotional bonding aesthetic attraction creativity imagination and even the recognition of a just and purposeful existence As Kellert explains each expression of biophilia shows how our physical material intellectual emotional and spiritual well being is to a great extent dependent on our relationships with the natural world that surrounds us *Kinship to Mastery* is a thought provoking examination of a concept that while not widely known has a significant and direct effect on the lives of people everywhere Because the full expression of biophilia is integral to our overall health our

ongoing destruction of the environment could have far more serious consequences than many people think In a readable and compelling style Kellert describes and explains the concept of biophilia and demonstrates to a general audience the wide ranging implications of environmental degradation Kinship to Mastery continues the exploration of biophilia begun with Edward O Wilson's landmark book *Biophilia* Harvard University Press 1984 and followed by *The Biophilia Hypothesis* Island Press 1993 co edited by Wilson and Kellert which brought together some of the most creative scientists of our time to explore Wilson's theory in depth *Encounter*, 1969 **Children, Nature, Cities** Ann Marie F. Murnaghan, Laura J.

Shillington, 2016-05-26 Why does the way we think about urban children and urban nature matter This volume explores how dichotomies between nature culture rural urban and child adult have structured our understandings about the place of children and nature in the city By placing children and youth at the center of re theorising the city as a socio natural space the book illustrates how children and youth's relations to and with nature can change adultist perspectives and help create more ecologically and socially just cities As a key contribution to children's studies the book engages and enlivens debates in urban political ecology and urban theory which have not yet treated age as an important axis of difference With examples from ten localities the chapters in this volume ask how we can subvert both romanticized and modernist conceptualizations of nature and childhood that conflate innocence and purity with children and nature the volume asks what happens when we re invent urban natures with children's needs and perspectives in mind **Meeting Fairies** R. Ogilvie Crombie, 2009 Over

forty years ago R Ogilvie Crombie had a remarkable life changing experience which opened up the world of fairies to him In his remaining years he had many encounters with nature spirits Very nearly lost to us his warm and detailed accounts reveal a world many yearn to know about *The Recurrent Green Universe of John Fowles* Thomas M. Wilson, 2006 Ecocriticism is the emerging academic field which explores nature writing and ecological themes in all literature Thomas M Wilson's book is the first to consider the work of one of the most critically acclaimed and generally popular post war English writers from an ecocritical perspective Fowles is best known as a novelist and author of such works as *The Magus* *The French Lieutenant's Woman* and *Daniel Martin* Going beyond the fiction this book also examines the many profound reflections on the natural world found in his essays poems and his recently published *Journals* John Fowles' writings have cast light on the ways we perceive the natural world from curious scientific observer to Wordsworthian lover of natural places as well as many other important and at this time crucial themes This volume will be of interest to critics and readers of contemporary fiction but most of all to anyone curious about their place in the recurrent green universe that is our earth **Schelling's Political**

**Thought** Velimir Stojkovski, 2022-11-17 In the first study to examine F W J Schelling's political thought Velimir Stojkovski not only unearths a neglected dimension of the influential thinker's philosophy but further shows what it can teach us about our ethical and political responsibilities today Unlike Hegel or Fichte Schelling never wrote a political treatise Yet by reconstructing the portions of such works as *The New Deductions of Natural Right* that deal explicitly with the political and

by thematically rethinking parts of his writings that have a clear repercussion on politics in particular those on nature freedom and religion this book reveals the centrality of politics to his oeuvre Revisiting his corpus in this way Stojkovski uncovers a number of ways we can learn from Schelling and his reception He examines how Schelling's views on nature can clarify our moral and political obligations to the non human world and further demonstrates how the separation of ontology as first philosophy from the ethico political has resulted in a fragmented view of the status of the political subject and thus the body politic Forcefully renouncing this fragmentation Stojkovski explores how the same divide has contributed to the ongoing political turmoil in Europe and America Combining an exploration of German Idealism with contemporary concerns this is an essential study that will introduce readers to a new Schelling a political thinker for the 21st century
