Kellogg, 2005-09-02 *Weaving the Past* offers a comprehensive and interdisciplinary history of Latin America's indigenous women. While the book concentrates on native women in Mesoamerica and the Andes, it covers indigenous people in other parts of South and Central America, including lowland peoples in and beyond Brazil and Afro-indigenous peoples such as the Garifuna of Central America. Drawing on primary and secondary sources, it argues that change, not continuity, has been the norm for indigenous peoples whose resilience in the face of complex and long-term patterns of cultural change is due in no small part to the roles, actions, and agency of women. The book provides broad coverage of gender roles in native Latin America over many centuries, drawing upon a range of evidence from archaeology, anthropology, religion, and politics. Primary and secondary sources include chronicles, codices, newspaper articles, and monographic work on specific regions. Arguing that Latin America's indigenous women were the critical force behind the more important events and processes of Latin America's history, Kellogg interweaves the region's history of family, sexual, and labor history with the origins of women's power in prehispanic, colonial, and modern South and Central America. Shying away from interpretations that treat women as housebound and passive, the book instead emphasizes women's long history of performing labor, being politically active, and contributing to even supporting family and community well-being.

*Anthropological Perspectives on Children as Helpers, Workers, Artisans, and Laborers* David F. Lancy, 2017-12-12 The study of childhood in academia has been dominated by a monocultural or WEIRD (Western, educated, industrialized, rich, and democratic) perspective. Within the field of anthropology, however, a contrasting and more varied view is emerging. While the phenomenon of children as workers is ephemeral in WEIRD society and in the literature on child development, there is ample cross-cultural and historical evidence of children making vital contributions to the family economy. Children's labor is of great interest to researchers but widely treated as extra-cultural and an aberration that must be controlled. Work as a central component in children's lives, development, and identity goes unappreciated. *Anthropological Perspectives on Children as Helpers, Workers, Artisans, and Laborers* aims to rectify that.

omission by surveying and synthesizing a robust corpus of material with particular emphasis on two prominent themes the processes involved in learning to work and the interaction between ontogeny and children's roles as workers
